ABOUT US:

Abacus Technology was established in 1983 as a minority-owned business dedicated to total customer satisfaction. Over the past 35 years, we have steadily grown and advanced as a top-quality provider of Engineering, Technology Acquisition, and Management consulting services. These key service areas are enhanced by our value-added capabilities in mission assurance, system integration, network engineering, research and analysis, integrated logistics, cloud adoption, and Foreign Military Sales. CAGE Code: 0FVN8.

OASIS EXPERIENCE:

Engineering, Professional, and Administrative Support Services

- AFLCMC/Command, Control, Communications, Intelligence, and Networks Directorate (C3I&N)
- AFLCMC/Mobility and Training Aircraft, Tanker, and Presidential and Executive Aircraft Directorates

CLIENT BASE:

- Air Force – AFMC, Global Strike, ACC, Air National Guard, AFOSI
- Department of Defense – US Central Command, Army, DSS
- Civilian Agencies – DHS, DOE, DOT, Interior, State
- NASA Centers – Kennedy, Johnson, Stennis, Marshall, Ames

CORE CAPABILITIES:

- Advisory & Assistance Services
- Acquisition Support
- System Engineering
- Program Management
- IT Service Management
- Cyber Security/RMF
- Technology Refresh
- Data Center Operations
- Unified Communications
- Agile and DevOps Software

STAFF QUALIFICATIONS:

- Project/Acquisition Management Professionals
- Certified Information Systems Security Professionals
- IT Service Management Professionals
- Lean Six Sigma – Black/Green Belts
- SCRUM Masters/Developers

Exceptional Ratings

Over 90% of ATI's CPARS ratings have been *Exceptional* or *Very Good* during the past five years

"It was a great pleasure working with ATI and your amazing team!!!!!! You are the best team I've worked with, very good work ethic, great knowledge and helpful. Thank you very much for all the support and great cooperation."

DHS Contracting Compliance Spec.
April 2020

ATI, Inc.

Since 1973, ATI's technical experts and managers have worked with government agencies, public/private institutions, non-profits and industry to solve critical problems affecting the built and natural environments. With projects completed throughout the United States and in over 160 other countries, ATI has the resources, capabilities and experience not usually found in a small business. We offer clients the best of both worlds; the cost-effectiveness, responsiveness and agility of a small business with the experience, resources and global reach of a much larger firm.

Our staff includes 100+ architects, engineers, scientists, project managers, construction managers and inspectors, CADD/GIS specialists, and skilled trade technicians supporting six major service lines.

We help our clients achieve outstanding results through innovation, commitment and responsiveness. From utilizing unmanned aerial vehicles on remediation projects, to researching, testing and demonstrating the latest technologies in paving, to using cutting edge materials and methodologies in building design and operation, innovation is ingrained in our DNA.

ATI's Services

- Architectural & Engineering Services;
- Facility Management & Operation;
- Environmental Compliance, Remediation, & Military Munitions Response;
- Program Management, IT & Technical Staffing Services;
- Construction & Construction Management; and
- Industrial Hygiene, Safety, Biohazard Testing & Decontamination.

Analytical Services and Materials, Inc. (AS&M) is a mature R&D company that has a reputation for technical excellence. Established in 1983, AS&M is a minority, woman owned Small Business with a **Top-Secret** Clearance. The company headquarters is in Hampton, Virginia.

AS&M has expertise in information technology, cybersecurity, data analytics including in the healthcare field, aerospace technologies, wind tunnels/facilities support, computational fluid dynamics, innovative coatings, structures and materials, fatigue testing and damage tolerance, and atmospheric sciences.

AS&M offers non-contact deformation measurement services using our VIC3D system for structural evaluation.

AS&M has developed and commercialized CFD software PAB3D for the Computational Investigation and numerical simulation of Jet Aerodynamics.

- Experience working with NASA, U.S. Air Force, Navy, Army.
- Provide Engineering Services through Seaport NexGen.
- Provide Engineering Services through GSA PES.
- Holder of OASIS SB Contract under Pools 1 , 3 and 4.
- Our industry customers include Lockheed Martin, Boeing, Jacobs, SAIC, Raytheon, ATK, KBR, GE, Rolls Royce, Pratt & Whitney, Goodrich, and several Universities.

AS&M is Certified in ISO-9001:2015 and CMMI-DEV Level II.

AS&M currently supports NASA Langley Research Center through several contracts (CMOE, TEAMS3, SAS, STARSS3, LITES2, and BAART).

We also support NASA Armstrong, Ames, and Goddard.

We have a Prime Contract with AFRL at WPAFB in Dayton, OH.

AS&M held a 13-year prime contract at NASA DFRC (1995-2008) and a 10-year subcontract with Jacobs Technology to support NASA Langley (2004-2014).

- ARS OASIS SB Pool 5A, GS00Q14OADS523
- ARS OASIS SB Pool 5B, GS00Q14OADS623
- ARS OASIS SB Pool 6, GS00Q14OADS742

ARS, headquartered in Dayton, Ohio, is a small business serving the Department of Defense and Intelligence Community. We deliver the ideal combination of Small-Business Agility with Large-Business Ability to provide the expertise, responsiveness, and commitment to ensure mission success. We specialize in providing fully cleared professionals, low density/high demand skill sets, and subject matter experts to solve our customers' most significant challenges. ARS is a trusted partner for all our customers' technical service needs.

Core Capabilities

Cyber Solutions: ARS is a recognized leader in cybersecurity resilience across the Department of Defense (DoD), bringing in-depth experience defending cyber interests and delivering advanced capabilities honed from protecting the Air Force's most valuable assets. Our solutions and services ensure an adaptive defense strategy, sustainable threat protection, and a mature security posture. We are experienced with computer network operations, including computer attack, defense, and exploitation; critical infrastructure protection and exploitation; malicious discovery & mitigation; digital forensics; side-channel analysis of existing and emerging electronic devices; and tech advancement forecasting.

Digital Modernization: We take a user-centric approach to enterprise IT and digital modernization. We provide an agile, resilient, transparent, seamless and secure IT infrastructure and services that transform data into actionable information and ensure dependable mission execution. Our approach advances the digital workspace with proven solutions in Service Oriented Architectures, mobile devices, cloud, database technologies, and network modernization. Our focus on DevSecOps provides an integrated and standard set of tools and methods that result in reduced security risk while meeting mission objectives of faster and more cost-effective project delivery. We also provide support for DoD programs such as LevelUp and other software factories.

Intelligence Programs: ARS provides MASINT and Geospatial Intelligence Tasking, Collection, Processing, Exploitation, and Dissemination (TCPED) solutions to the national and tactical DoD/IC. Our personnel provide expertise, innovative tools, advanced algorithms, and new techniques to help our customers get the most from intelligence data. We provide a full spectrum of intelligence support: research and development, analysis and production, counterterrorism, hard target analysis, software development, DevSecOps, systems network and administration, enterprise architecture design, and data services.

Logistics Support Services: ARS helps DoD agencies and their contract managers navigate today's dynamic acquisition environment with proven strategy, management, and guidance from experienced logistics managers. We provide logistics & warehousing, leak monitoring, analytical, IT, administrative, and other support services for DoD facilities. ARS also provides planning, programming, engineering services, facility management, and construction management oversight for DoD facilities and infrastructure. We operate the largest Secure Compartmented Information Facility (SCIF) in the USAF, requiring all employees and contractors to have a security clearance.

Research & Education Support: Our Team delivers a broad range of education services and expertise to support basic and applied research in the areas of Cyber, Directed Energy (DE), Operations Analysis, Space Systems, Systems Engineering, and Technical Intelligence. We also provide programmatic financial, and sponsored programs office support for research activities. In addition, we research DE enabling technologies and DE system concepts through experiments, modeling and simulation, and analysis.

Program Management: Our professionally trained and certified Program Managers provide the full spectrum of program management, including requirements generation, planning, programming, budgeting, test, analysis, & integration, and risk analysis & mitigation, to deliver capability and capability-based solutions for current and future DoD and Intelligence Community gaps.

Data Science and Engineering: ARS provides a wide range of products and technical services for our customer base. We design, develop, and test autonomy, AI, and ML prototype technologies and unmanned systems for warfighter application; conduct R&D efforts with Research Lab and University partners; identify technology transition paths; serve as the virtual environment developer for critical technology products; and provide technical and programmatic services for key customer programs. In addition, we provide Agile Software Development and Cloud computing services across several agencies.

Clearance: ATI has cleared Top Secret/SCI professionals, Top Secret facility clearance, and Secret storage approval.

Regulations: ATI closely adheres to FAR, DCAA, and other sets of relevant regulations.

ATI is part of a Washington, D.C.-area consortium, organized to develop and fabricate high-technology and operational sensors and systems. Specialty areas include:

- Optical
- Mechanical
- Electronic; Electrical
- Power distribution and control
- Firmware; Software
- Signal processing
- Sensor and image fusion
- Algorithm development
- Implementation
- Manufacturing technology and production.

Applied Technology, Inc. (ATI) is a small business with primary business areas in:

(1) research, development, engineering, and program management services to Department of Defense (DoD) customers and

(2) hardware design, development, and fabrication.

Demonstrated Past Performance

Incorporated in 2006, ATI has been contracted to provide products at Navy labs, Systems Commands, Naval Warfare Centers, Fleet support activities, and other DoD agencies. For more than 40 years ATI's managers have successfully run several high-technology, Fleet support companies and Government technical and operational entities as both contractor and/or previous government employee.

Technology Capabilities

Ascella Technologies, Inc. (Ascella) was founded in 2002 with the mission to deliver value-added services and technology-based solutions that generate real results for government agencies. Ascella has supported U.S. Federal Government agencies on more than 20 system implementation, financial management, and IT support projects. **With Ascella, "Your Success is Our Commitment."**

CAPABILITIES

Business Process Optimization and Automation: We work with our clients to review process and system workflows to maximize efficiencies and reduce costs. We have extensive experience executing business process reengineering activities to improve quality and provide cost-savings to our clients.

Financial and Acquisition Management: We blend technology-based solutions with budget, financial management, and accounting activities to streamline processes and generate cost savings. We specialize in financial risk analysis and budget analysis, tracking, fraud detection, auditing, user acceptance testing, and helpdesk management and support.

Data Science, Analytics, and Business Intelligence: We offer services in data management, business intelligence and complex data analysis utilizing preferred client tools to deliver client solutions. We have extensive experience assessing, testing, and refining performance data for improved decision-making.

Project and Program Management: We staff teams with deep agency and subject matter knowledge, to facilitate analytical thinking and collaborative development of practical solutions. Expert proficiency of business processes, drivers and objectives is integral to our project and program management methodology. We apply a range of project management tools, methods, and processes appropriate for our clients to support project execution and governance.

Enterprise Costing and Analysis: We leverage rigorous financial management practices and costing solutions to help agencies better understand the relationship between consumption and outcomes.

Agile Transformation Services: We take a pragmatic approach towards helping our clients navigate their transition to Scrum, Lean or Kanban in an achievable and sustainable manner. We also provide extensive coaching and training on the Scaled Agile Framework (SAFe), scaled Agile best practices, and Agile methods (Scrum and Kanban).

BPAS

Business Process & Automation Services

Who We Are

Business Process and Automation Services is a SDB company that excels in Data Science and Analytics, Systems Engineering, and Program Management. Utilizing experience and background in interdisciplinary sciences and engineering, BPAS provides scalability, resources, and flexibility to manage our customers' changing and growing needs. Founded in 2008, the company has quickly developed into a team of experts who are proficient in several skills with professionals averaging over 15 years of experience. These abilities include but are not limited to data science and analytics, systems engineering, program and project management, and contract and procurement management.

Our Approach

We work in an objective, customized, and creative manner to provide smart and custom software automation solutions to satisfy our client's core needs. We provide comprehensive services that deliver efficient and manageable solutions. Our focus is on providing simple integrated solutions that benefit from process standardization, process simplification, and process optimization.

Our People

BPAS has an experienced team of highly qualified experts who have a diverse range of various skillsets and abilities. Here are some of the qualifications that elevate us from rest of the competition:

15 Years — **Average** of over 15 years of industry experience per staff member

50% — **Over 50%** of the staff have advanced degrees with certifications/training from Oracle, Microsoft, and AWS

CATAPULT CONSULTANTS, LLC

One Acquisition Solution for Integrated Services

Catapult Consultants (founded in 2003) is a global professional services and management consulting company specializing in advanced business analytics and information systems solutions. We support mission-critical programs in the Defense, Civilian and Intelligence Community sectors.

CYBER SECURITY, ANALYTICS, & DEVELOPMENT

- **Computer Network Defense:** full range of cyberspace operations from network analysis and threat reporting to incident response.
- **Cyber Engineering:** developing and leveraging new technologies and solutions across cyberspace and in health databases.
- **Cyber Analytics:** developing analytics to identify program anomalies, outliers, and efficiency enhancement opportunities

REGULATORY COMPLIANCE

- **Program Integrity:** Federal oversight of nationwide and state programs to ensure provider compliance with regulations to identify fraud, waste, and abuse.
- **Audit Readiness & Regulatory Compliance:** assist agencies with audit readiness, A-123, financial improvement and regulatory compliance.
- **Regulatory Remediation:** leverage audit readiness and compliance skillsets in remediating regulatory gaps.

DATA ANALYTICS

- **Predictive Diagnostics:** historical and future trend identification to reveal patterns and anomalies in data, such as threat, frauds, waste, and abuse.
- **Data Integration:** mapping and integrating structured and unstructured data sets for use and analysis.
- **Data Visualization:** historical and real time pattern monitoring to reveal data anomalies.

PROGRAM MANAGEMENT

- **Management Frameworks:** program and project management using frameworks for planning, controlling, executing, and completing federal projects and administrative programs.

Tribally Owned Small Disadvantaged Business

Tribal 8(a) Contracting Benefits:

- Contracts are awarded rapidly for quick-turn acquisition & purchasing
- 13 CFR 124.506(b) provides no limit on contract dollar amount to tribal 8(a) companies
- Direct award ceiling, without J&A, ***up to $22 million***
- For DoD agencies, direct award ceiling, without J&A, ***up to $100 million*** – per the revision of Section 811 of the NDAA
- Unlimited direct award ability with approved J&A requirements
- Tribal 8(a) sole source awards are not protestable
- Streamlined process allows for administrative cost savings

Cherokee Nation Strategic Programs (CNSP) is part of Cherokee Federal, a team of tribally owned companies that serve federal agencies globally. Cherokee Federal is owned by Cherokee Nation Businesses — the economic engine of Cherokee Nation, the largest Native American tribe in the U.S. One-hundred percent of the company's profits support future business investments and the well-being of the tribe's citizens through health care, education and job creation.

About Us

When it's time to safeguard America's sensitive data, critical infrastructure and invaluable personnel, you need an experienced team to handle every detail. From intelligence and cybersecurity to vulnerability assessment and mission assurance, CNSP provides experience and results.

Building on a reputation as a dedicated, disciplined and tightly-knit organization, CNSP supports the Department of Defense and federal clients in the execution of their critical, strategic and operational programs.

Proven & Tested Solutions

CNSP has the flexibility and financial stability to support a wide range of operations:

- **Strategic Operations**
  - Maritime Operations and Training
  - UAS Operations and Training
  - Security Assessment and Training
  - Conventional/Unconventional Military Operations and Training
- **Intelligence & Data Analytics**

As a top performer under OASIS and as the recipient of 60+ prime task orders under the OASIS program, Credence is your ideal partner for OASIS SB and Unrestricted tasks. Our differentiators include our broad portfolio of prime contract work across all OASIS domain areas; our robust infrastructure to support large-scale, complex assignments for Federal customers; our flat structure to allow for rapid, agile responses; and our exceptional CPARS evaluations. Credence is a leader amongst OASIS vendors in providing innovative management, technology, and engineering solutions to Federal government clients—delivering results quickly and cost effectively.

Credence has successfully supported U.S. government customers since 2005, with 95 percent of our work being performed as a prime contractor and with exceptional past performance references.

DANIEL EKE AND ASSOCIATES, P.C.

ABOUT US: Nationwide provider of accounting, auditing, and Human Resources support services. Daniel Eke and Associates, P.C. (DE&A) is a certified public accounting firm specializing in the public sector. DE&A is a Hubzone certified minority-owned business. Since its founding in 1991, DE&A has maintained high standards in performing services for the Federal Government. This focus on the federal sector has given DE&A an unequalled advantage in developing skills sets that are germane to the requirements of federal government in the areas of financial, accounting, auditing, and Human Resources services. For instance, DE&A was part of the auditability assessment team for Defense Logistics Agency with assets in excess of 14 billion dollars. This effort entailed coverage locally and nationally. DE&A's core team of employees comprised of individuals that have experience in applying the Statement of Federal Accounting Standards (SFFAS) and in performing audits in accordance with Government Auditing Standards (GAS). DE&A is currently supporting the Department of State – Foreign Services Institute (FSI) on a wide range of Human Resources Support Services to include but not limited to: Procurement, Classification, Employee Relations, and Staffing services.

APPROACH

ECODIT is a recognized leader in bringing people and ideas together to create a positive lasting impact on individuals and institutions. At ECODIT, we believe that technologies and policies can produce long-lasting positive outcomes only if the organizations responsible for them share common vision and values, empower their staff and constituents to think and act creatively, and incentivize them appropriately. To achieve enduring results, we bring together people with know-how, innovative ideas, and proven talents, and we work side-by-side with them to design, develop and implement programs that are adapted to their situation and needs. ECODIT is an ISO 9001:2015 certified company, recognized for striving to ensure that services meet clients' requirements and that quality is continually improved.

CAPABILITIES

ECODIT has provided an extensive range of professional services and has implemented more than 250 projects for diverse clients in more than 50 countries. This includes experience managing complex, multi-million-dollar U.S.-based and overseas projects and contracts for the United States Agency for International Development (USAID) with multiple technical streams and objectives. ECODIT is flexible and nimble, and stresses continuous learning, partnership, and innovation in all of its work. Our core capabilities suited specifically for the GSA OASIS SB vehicle include the following:

Program Management Services

- Program Management
- Integrated Program Management
- Project Management
- Stakeholder Requirements Analysis
- Technical Planning
- Technical Assessment
- Technical Data Management

Management Consulting Services

- Change Management
- Concept Development and Requirements Analysis
- Knowledge Management
- Social Media Consulting
- Technical Advisory Services
- Training and Facilitation
- Strategic Planning
- Strategic Forecasting
- Strategy Development

Engineering Services

- Alternative Energy Sources and Engineering
- Environmental Management
- Environmental Consulting and Remediation
- Natural Resources Management

Scientific Services

- Environmental Sciences
- Social Sciences

ECODIT PROJECT HIGHLIGHTS

Water

Environment

Energy

Governance

ECODIT has implemented **more than 250 projects** for diverse clients **in more than 50 countries**. This includes experience managing complex USAID projects and contracts at the country and regional levels with multiple technical streams and objectives. Below is a selection of ECODIT's ongoing and recently completed multi-year projects.

Water

USAID Water Communications and Knowledge Management (CKM) Project, $15M, 2015 –2021

- Supports the USAID Center for Water to increase knowledge and data capture; enhance communications and outreach; and facilitate knowledge sharing and learning

Energy

Power Africa Data and Technical Support Services Activity, $5.7M, 2019-2024

- Provides capacity building and technical and data support to the U.S. Government PA Initiative

Niger Mini-Grid Feasibility Study, $17M, 2019-2020

- Provided technical and economic feasibility studies for solar mini-grid sites associated with 69 telecommunications towers located across roughly 100 villages in rural Niger

USAID Central Asia Energy Links Project, $23M, 2014-2020

- Worked with governments, public utilities, and the private sector to improve energy cooperation, trade and security throughout the Central Asia region and provided high-level leadership to the multi-donor CASA-1000 power transmission infrastructure project, which will allow Tajikistan and the Kyrgyz Republic to export seasonal surplus hydroelectricity to energy-deficient Pakistan and Afghanistan

USAID Democratic Republic of Congo (DRC) Power Sector Reform (PSR) Project, $6.9M, 2016-2019

- Provided assistance to the Government of the DRC to revise its power sector strategy; improve energy policy; and establish, staff, and support the new Regulatory Authority and Rural Electrification Agency

Environment

USAID Lebanon Diverting Waste by Encouraging Reuse and Recycling Activity, $15M, 2020-2025

- Works to o establish sustainable and replicable integrated solid waste diversion and valorization solutions in rural areas of Lebanon

USAID USAID Zimbabwe Resilience through Accelerating New Community-based Holistic Outcomes for Resource Sustainability (RESILIENCE ANCHORS) Activity, $19M, 2020-2025

- Builds the capacity of local partners and communities on sustainable natural resources governance to safeguard biodiversity and build community resilience

USAID Cambodia Green Future Activity, $5M, 2019-2024

- Mobilizes civil society, government bodies, and communities to conserve biodiversity and protect natural resources

USAID Vietnam Green Annamites Activity, $24M, 2016-2021 (REPLACE IDIQ)

- Works with provincial governments to protect Vietnam's significant biodiversity; improve land use practices; help local ethnic minority communities to diversify and improve their livelihoods; and mobilize private sector resources for conservation and livelihood initiatives

Governance

USAID Communications, Evidence, and Learning (CEL) Project, $30M, 2018-2023 (Subcontractor)

- Supports the dissemination of evidence-based knowledge in land tenure, property rights, and resource governance, as well as in urban development, urban-based programming, and sustainable cities

About Us

ERT is a science and technology company providing clients with innovative services and solutions to their scientific, engineering, environmental, and information technology (IT) challenges. Headquartered in Laurel, Maryland, ERT boasts a nationwide presence and a proud 25-year history, and is the third largest company supporting NOAA, by revenue. Our primary customers include NOAA, NASA, USGS, U.S. Army Corps of Engineers, and the U.S. Air Force. ERT's staff is comprised of scientists, technologists, engineers, and IT specialists providing services in the following disciplines: mission-oriented scientific and data systems, ground system development, systems engineering and mission operations, IT/cybersecurity, management, and education and outreach. Approximately 45 percent of our staff hold Ph.D. or master's degrees. In addition, many of our senior staff hold professional and industry certifications in project management, quality management, health and safety compliance, enterprise architecture, cloud services, cybersecurity, and geological engineering.

Capabilities

- Earth and space science modeling and algorithm development
- Engineering implementation and operations of scientific models and algorithms
- Satellite ground systems, RF and optical communication and detection systems operations
- Full lifecycle system design, engineering, development, and operation
- Full data lifecycle management, analytics, and visualization
- Program Management and consulting Services

OASIS℠
One Acquisition Solution for Integrated Services

About Us

Federal Mission Solutions (FMS) is an 8(a) and HUBZone joint venture resulting from an SBA-certified mentor-protégé relationship between SD Solutions, LLC. and E3 Federal Solutions, LLC. Our joint venture not only strengthens the existing mentorship relationship, it allows us the ability to jointly provide mission-focused services and solutions to our Federal clients.

- FMS brings the agility and speed of a small business (SD Solutions) with the experience and resources of a large business (E3) to provide our customers with a strong, capable, and flexible organization with a wide range of expertise.
- Our team of dedicated colleagues provide a wide range of skills and expertise across multiple recruiting workstreams with unmatched delivery excellence while maintaining an innovative and entrepreneurial culture that is laser-focused on positive customer outcomes.

Our Clients

We reach a broad spectrum of Federal customers which include:

- Countering Weapons of Mass Destruction (CWMD)
- Customs and Border Protection (CBP)
- Defense Advanced Research Projects Agency (DARPA)
- Department of the Army
- Department of Commerce
- Department of Defense
- Department of Health and Human Services (HHS)
- Department of Justice (DOJ)
- Department of the Navy
- Department of Transportation (DOT)
- Department of Veterans Affairs (VA)
- Federal Emergency Management Agency (FEMA)
- General Services Administration (GSA)
- Internal Revenue Service (IRS)
- Immigration and Customs Enforcement (ICE)
- National Institutes of Health (NIH)
- Transportation Security Administration (TSA)
- Space Development Agency (SDA)
- United States Census Bureau
- United States Coast Guard (USCG)

Our Capabilities

- Cybersecurity
- Digital Transformation and Innovation
- Engineering and Technical Services
- IT Project and Portfolio Management
- Mission Analytics and Strategic Advisory
- Strategy and Governance

One Acquisition Solution for Integrated Services

Our Mission

- We are dedicated to enhancing our Nation's Growth and Security by supporting our Government's mission to sustain critical infrastructure and its information enterprises for our Federal Civilian, Homeland Defense, Intelligence Community, Defense Department, and Law Enforcement Clients.

Process Driven Approach

- ISO / ITIL/ CMMI Proven Methodologies
- All services are Mature, Measurable and Repeatable

Financial Strength and Stability

- Privately held, no debt
- DCAA Audited rate structure and CAS compliant accounting system
- 90% of contracts performed as Prime
- 90% Retention rate over last 3 years

Federated delivers as of Day One:

- Proven ability to start from scratch and deliver capability and value
- Transition Time is productive

Federated IT Delivers Capability: *"Federated IT was pivotal in providing highly qualified personnel during the Migration of 65 racks of equipment from the Department of Homeland Security's Ashburn Data Center to Stennis Data Center in Mississippi. The Federated personnel provided unique capabilities using enterprise solutions that actually helped save the DHS time and money during the migration efforts." - - - - Lynn Denton, Program Manager*

334290 - Other Communications Equipment Manufacturing

CONTACT

Mr. Robert Louis Clark
Vice President
619-933-3332
rclark@forwardslope.com

CAPABILITIES

Experts in:

- World-class Software Development and Engineering Services
- C4ISR Software/Systems Engineering - Navy and Joint Programs
- COP/CIP Visualization - Navy and Joint Programs
- Cloud-based Software/Systems Engineering and Enterprise Business Tools
- Intelligence Preparation of the Battlespace - Meteorological and Oceanographic (METOC) Software/Systems Engineering and Applications Development
- Deployment of Border and Coastal Surveillance Systems/Pacific Infrastructure

DIFFERENTIATORS

Unique Small Business Qualifications:

- CMMI Maturity Level 3 – Leveraging an Agile Scrum-based methodology for software development since 2011
- 10+ years experience supporting Navy/JointC4ISR and COP/CIP visualization and operational integration
- Transitioned multiple S&T efforts from RDT&E to Programs of Record (POR) operational deployments
- Transitioned major legacy enterprise business tools to modern cloud-based architecture
- 10+ years experience performing site surveys, developing, deploying and maintaining border and coastal sensor surveillance systems in harsh foreign environments
- Developed ForSIGHT - turn-key FSI platform for integrated tactical sensor surveillance and reconnaissance in harsh environments
- Developed IKANOW - turn-key FSI big data ingest and analytical platform
- TS Facility Clearance—with an extensive Clearance/CAC-ready staff

PAST PERFORMANCE

Demonstrated Experience:

- Awarded 16 DoD/DoN Prime Contracts and 80+ Subcontracts
- 12+ years Executive Level NAVAIR (PEO Air and PEO Unmanned) acquisition and requirements liaison between AIR ASW & MIW Systems, Sensors and Platform Programs and the Navy's ASW and MIW Centers of Excellence (COEs)/Warfare Development Centers (WDCs)
- Software developer for V-22 Osprey's Comprehensive Automated Maintenance Environment-Optimization (CAMEO) / Readiness Integration Center (RIC)
- 12+ years Space and Naval Warfare Systems Command support/experience. Pioneered the use of Agile Scrum-based methodology at SPAWAR PMW 120 / SSC-PAC during software development of NITES-Next POR
- Participated in ONR S&T research initiatives resulting in the development of technologies which transitioned to Navy PORs (e.g. NITES-Next and MTC2)
- Performed design, development, logistics, software engineering, integration, testing, installation, and training of C4I-based border and coastal sensor surveillance systems in 17 countries with 120 Sensor Sites and 20 Command Centers

www.FusionOnline.com

Media Fusion, Inc. | 4951 Century Street | Huntsville, AL 35816

Founded in 1995 and originally conceived as a media production studio, Media Fusion, LLC has grown into a nationally recognized support services company. Our capabilities cover program management and office administration, strategic communications, user experience design and every aspect of digital content and multimedia production. Our production studio is an 8,000 square foot facility in Huntsville, AL. Our tribal parent is the Poarch Band of Creek Indians of Alabama and they provide a strong backing representation.

Strategic Communications and Multimedia Productions - Our strength is our ability to help customers communicate their desired message to the intended audiences. From creating communications plans to executing those plans, Media Fusion has the expertise to assist our customers to effectively communicate and tell a compelling story to meet the communications goals. Our award-winning multimedia development services include graphic design, creative and technical writing, video production, photography, animation, virtual reality, and web development in our corporate office and onsite serving Federal customers. Utilizing these communications products, we assist our customers with various mediums, including traditional media, web, social media, exhibits, events, and presentations.

Services:

- Strategic
- Multimedia and Graphic Productions
- Exhibit Management
- Engineering Test and Visualization
- Business Support
- Facilities Management
- Program and Resource Management

Business Support - We support our Federal customers with employees co-located on government facilities and at our corporate offices. We are an extension of these customers' missions and partner with them to reach their goals. How do we do this? We introduce new and innovative approaches, methods, and technologies to increase performance and save our clients money.

Program Management - We have a record of more than two decades and $90M of successful past performance in Program Management. Dedicated to our customers' success, our staff have met the demands of some of the most challenging requirements. We have been fortunate to receive numerous awards for our program management success, including:

- NASA Armstrong Flight Research Center and NASA Agency- Small Business Subcontractor of the Year
- NASA Goddard Space Flight Center – NASA Headquarters Small Business of the Year
- NASA Marshall Space Flight Center Small Business Subcontractor Excellence Award
- NASA customer Service Award

We are very proud of these awards, but perhaps our greatest achievement is Customer Satisfaction, which reflects in our CPARS ratings of "Exceptional" and consistent Customer Satisfaction scores between 90% and 100%.

GRAHAM TECHNOLOGIES

Since 2007 Graham Tech has been a trusted partner throughout the Federal Civilian, Defense, Intelligence, and National Security ecospheres. We provide forward momentum by not just "promising" emerging technologies – but by applying the *right* technologies the *right* way – with the objective of delivering targeted and measurable results. Our experiences continually demonstrate that this is how well-formed, lasting outcomes are developed and delivered. Our team of innovative and highly-skilled engineers specialize in cloud, application modernization, data analytics, IA, and cyber security. We build robust, scalable, flexible and high performing solutions and services - on time and in budget.

We make sure that our clients' goals are fully understood and then we implement agile processes to ensure we deliver to, or beyond, expectations. We work with care, expertise, and diligence to deliver the greatest return on investment.

WHO WE ARE:

Built on decades of serving all branches of the military, Department of Defense, and civilian organizations, INTERFUZE is meticulously engineered to deliver comprehensive, innovative solutions and exceptional performance to support the United States Agency for International Development's (USAID) missions. INTERFUZE's collaborative team of diverse and talented people – engineers, designers, scientists, logisticians, analysts, technicians, cyber/IT and business professionals – share the vision to be the Partner of Choice for government services through a relentless focus on excellence in all that we do.

INTERFUZE's wide range of core competencies provides the depth and breadth of talent necessary to address the needs of our client. Through its OASIS UR/SB Pool 3 and 4 contracts, INTERFUZE is now able to offer Best in Class contract services.

WHAT WE DO:

- **Engineering Science & Integration** INTERFUZE provides innovative solutions for complex human, space, and weapons systems serving soldiers, first responders, government agencies, community planners, and others that keep our country moving forward.
- **Environmental & Infrastructure** INTERFUZE ensures our clients can operate safely, efficiently, and strategically in even the most challenging locations. We have decades of experience with range management and CBRNE response management.
- **Logistics & Operations** INTERFUZE provides expertise in Integrated Logistics Services (ILS) and Operations Support, including life cycle management, procurement, inventory, and asset management.
- **Training & Exercises** INTERFUZE provides the education and capability to protect military and civilian lives by improving the readiness of personnel to meet their mission requirements.
- **Enterprise IT Services** INTERFUZE develops and maintains secure, reliable, and responsive IT infrastructure systems designed to meet our client's goals and mission. Focusing on end-user satisfaction, INTERFUZE is an industry leader in Enterprise IT services for the Military, and Civilian Agencies.
- **Mission Support & Program Integration** INTERFUZE delivers effective solutions for critical government programs, complex federal projects and cutting-edge Research and Development activities.

Jefferson Solutions (Jefferson) is the government consulting company of Jefferson Consulting Group, LLC, a **woman-owned small business**. Jefferson provides acquisition, human capital, grants management, and program management services to help agencies successfully achieve their missions through sound, results-focused management. We have supported more than 60 federal agencies in more than 40 countries in Africa, Asia, Latin America, and the Caribbean.

Jefferson has been supporting USAID since 2007 and as of March 2021 have more than $131 million in funding across nine active USAID institutional support contracts and subcontracts. We are one of the leading small businesses that USAID counts on for institutional support.

Jefferson's CTA partner, Stratitia Inc., is a small business that implements collaborative methodologies to address agency challenges, improve performance, and achieve mission results. Stratitia supports federal and commercial clients in the U.S. and overseas in the areas of Defense medical logistics, acquisition program transformation, program management, and biomedical research & development support services.

About Us

Peerless Technologies Corporation (Peerless) performs a wide array of program management, information technology, cybersecurity, software development, research, engineering, test and evaluation services, business operations support and logistics services for a wide array of Department of Defense (DoD) and non-DoD federal customers.

Founded in 2000 and based in Dayton, Ohio, Peerless has almost 500 employees in 19 states and Washington D.C. The company maintains a mature corporate infrastructure, including dedicated managers for Human Resources, Recruiting, Quality, Contracts, Purchasing, Pricing, Program Control and Security to support operations and functions nationwide. In addition, our headquarters facility is cleared at the Top Secret level. Peerless uses approved DC A A accounting and DCM A purchasing systems.

Peerless has an ISO 9001:2015 certified Quality Management System, an ISO 14001:2015 Environmental Management System and is assessed at Capability Maturity Model Integration Level 3 to ensure technical performance and financial and contract management quality.

THE PROSPECTIVE GROUP

MANAGEMENT CONSULTING SERVICES

Founded in 2009, The Prospective Group (TPG) is an economically disadvantaged woman owned business (EDWOSB) and minority owned small business providing information technology (IT) and management consulting services. TPG is distinguished by its seamless ability to work collaboratively across organizations using highly adaptive Agile methods, putting customer interests first and ensuring substantial and lasting improvements to processes and the mission. We have a track record of achieving high levels of customer satisfaction resulting in multiple engagements with many clients in a global setting. We meet or exceed requirements and expectations at the management, stakeholder and end user perspectives. We approach our engagements as shared endeavors with rapid progress toward tangible interim goals and products that are continually refined over time.

OUR SERVICES

- **Business Process Re-engineering (BPR)** – Conduct BPR, leveraging dashboards and analytics, to improve performance metrics and mitigate risk. Focusing on automated data analysis and predictive intelligence.
- **Acquisition Plans and Strategies** – Develop IGCE, SOWs, Feasibility Studies, Cost Benefit Analysis, and Determination of Findings for successful contract awards.
- **IT Strategic, Tactical, and Investment Planning** – Conduct Federal Government Capital Planning and Investment Control (CPIC) Reporting, establish and facilitate IT capital governance structures for executive level bodies.
- **Project Life Cycle Management** - Includes Agile-based methodologies and SDLC processes, requirements management, product design and security reviews, and quality checks to deliver quality end products that meet or exceed customer needs.
- **IT Security and Risk Management** – Provide support for all phases of the Assessment and Authorization life cycle process in compliance with NIST Risk Management Framework (RMF), Federal Risk and Authorization Management Program (FedRAMP) and Federal Information Security Management Act (FISMA).
- **Government-wide Mandates** – Assist clients with addressing mandates such as, Cloud Smart, Open Government, Homeland Security Presidential Directive (HSPD) 12, Green Initiatives, and Legacy Modernization Planning.
- **Foreign Policy Expertise and International Experience** - Optimize diplomacy and defense convergence to promote visionary national security policymaking, planning and implementation by reinforcing common goals between DoS, USAID, and DoD and promoting collaboration between diplomatic and military activities. TPG has extensive experience with deploying skilled personnel overseas in support of U.S. foreign affairs agency initiatives.
- **Scientific Research** - Support research and analysis for human development, improving reproductive health, enhancing the lives of children and adolescents, and optimizing abilities for all.

OUR CLIENTS

- **Department of State** – OCIO/CISO, International Narcotics and Law Enforcement, Political and Military Affairs, Information Resource Management, Foreign Service Institute, Consular Affairs, Diplomatic Security, Management, Administration, Intelligence and Research
- **NIH** – National Institute of Child Health and Human Development: Population Health Research
- **OMB/OPM** – Performance Accountability Council Program Management Office: Security and Credentialing, Trusted Workforce
- **Defense Counterintelligence and Security Agency** – Acquisition and Contract Support Services, IT Strategic and Capital Planning

> *"Professionally run; professionally staffed. Excellent project partner."*

RiverTech

About Us

As a wholly owned subsidiary of Akima, an Alaska Native Corporation, RiverTech is uniquely positioned to support the federal government's critical requirements through OASIS.

RiverTech is an agile, trusted company that offers robust capabilities, deep mission understanding, top CPARs and welcomes the opportunity to support your upcoming mission requirements. Together with its sister companies, RiverTech has offices located across the United States and around the world and can swiftly execute orders of both small and large magnitude. Our team stands ready to support your immediate needs.

Our Capabilities

Facilities, Maintenance & Repair

Comprehensive services for equipment and vehicle maintenance, as well as building support services and management.

- Base Operations
- Civil Engineering
- Facilities Operations & Maintenance
- Range Operations
- Real Property Management
- Utilities & Infrastructure Support

Information Technology

Full spectrum IT product and support services.

- Advanced Analytics / AI & Machine Learning
- Cybersecurity
- Engineering & Development
- Enterprise IT
- IT Products
- IT Services Management
- Technology Solutions

Logistics & Supply Chain

From the warehouse to the airfield, our expert logisticians deliver support services designed to optimize and maintain all the links in our customers' supply chains.

- Aerospace Support Services
- Contractor Logistics Support
- Depot Level Maintenance, Repair & Refit
- Global Logistics Support
- Maintenance, Transportation & Supply Chain Management

Protective Services

Akima provides enhanced security, a proven quality-focused project management approach, and technology platforms that streamline detention operations, reduce programmatic and operational risks, and strengthen our nation's security.

- Access Control
- Armed and Unarmed Guards
- Base Security
- Detention Management/Prisoner Transportation
- Emergency Response
- Vulnerability Assessments

Systems Engineering

From pre-systems acquisition analysis and development to engineering, deployment, and sustainment—our experts support customers through the complete systems lifecycle.

- C5ISR
- Equipment Maintenance
- Research & Development Support
- Wired & Satellite Telecomm Service

Mission Support

Comprehensive professional services to support federal agency missions. Our expert teams are rapidly deployable, always reliable, and offer innovative solutions to help you transform your operations.

- Intelligence Analytics
- Office Administration
- Records Management
- Research & Development
- Staff Augmentation
- Subject Matter Expertise

Furniture, Fixtures, & Equipment

A single point of contact and accountability to handle facility outfitting—from planning and artwork to medical devices and IT.

- Health Facility Outfitting
- Initial Outfitting & Transition Services
- Planning & Management Services
- Products

Construction

Specializing in design/build projects of all sizes.

- Civil & Marine Construction
- General Contracting
- Interior Construction & Renovation

ABOUT US

S&K Engineering and Research, LLC is an SBA 8(a) Certified, tribally owned, Small Business headquartered in St. Ignatius, Montana, with offices around the country. The company is one of ten subsidiaries in the S&K Technologies, Inc. Family of Companies and is owned by the Confederated Salish and Kootenai Tribes.

S&K offers Federal Department of Defense (DoD) and Civilian customers an abundance of relevant skills, knowledge, trained personnel, and in-place processes and procedures. We have years of relevant Engineering, Technical, Logistics, and Administrative experience that can be specifically applied to any resulting effort. This allows us to quickly transition and ramp up to provide qualified personnel, equipment, material, supplies and supervision to meet the requirements of all our Federal customers.

ABOUT

Strategic Alliance Business Group LLC (SABG) has a proven record of successful contract execution, developing and implementing cost effective, low risk solutions. SABG is a scalable, long-range, execution-oriented company successfully accomplishing large, highly visible, strategic projects for multiple Federal customers. The company is highly agile, providing strong and comprehensive support to DoD and DHS across numerous geographic locations on contracts of various sizes.

CAPABILITIES

Strategic Planning & Communications: SABG provides day-to-day strategic planning management, supporting customer strategies, goals, and objectives to help optimize and strengthen mission operations.

Acquisition Management: SABG provides a comprehensive acquisition strategy, assisting policy and process development and procurement activities to support all phases of the acquisition cycle.

Engineering: SABG provides comprehensive interdisciplinary management processes culminating in an integrated, lifecycle balanced set of system solutions to satisfy customer needs.

Budget Development & Execution: SABG supports budget planning, development, and execution needs to ensure the timely availability of resources to achieve the customer's financial and mission objectives.

Program Management: SABG provides a wide range of program management services, identifying and managing the issues, requirements, risks, and solutions in projects of varying size and complexity.

Facilities Lifecycle Management: SABG delivers innovative solutions for the enhancement and sustainment of an organization's infrastructure and facilities operations.

ABOUT US:

We are an engineering solutions company that solves our nation's most complex challenges. We are proud of what we do in moving our nations agenda forward. As an established 32-year old company, SUBSYSTEMs provides systems integration and program management support services to defense and civilian agencies. Our company has gained considerable experience supporting the U.S. Army, where we provide research, testing and lifecycle management support for a wide range of technology solutions including those that provide physical security situational awareness and force protection. SUBSYSTEMs also has a significant presence supporting the Federal Aviation Administration (FAA) in both logistics and acquisition management. We have supported the Department of Homeland Security's U.S. Citizenship and Immigration Services (USCIS) and the Department of Justice's Drug Enforcement Administration (DEA) with software engineering, and the intelligence community with a full range of cybersecurity expertise.

OASIS℠
One Acquisition Solution for Integrated Services

ABOUT US:

SURVICE is a family-owned small business (under NAICS 541715) that has provided the Department of Defense (DoD) and other customers with high-quality analytical products and services for nearly 40 years. The company was founded to perform specialized survivability/lethality analyses; however, we have continued to expand and enhance our capabilities to support a wide range of industries.

CONTRACT INFORMATION:

- OASIS SB Pool 4 - GS00Q14OADS437
- OASIS SB Pool 5A - GS00Q14OADS519
- OASIS SB Pool 6 - GS00Q14OADS734

CORE CAPABILITIES:

SYSTEMS ANALYSIS & ENGINEERING We have been a leader in analyzing the composition and performance of U.S. and foreign air, land, and sea combat systems. We conduct a wide variety of ballistic and nonballistic analyses and systems engineering studies, including analyzing threat-target interactions; susceptibility and vulnerability reduction; platform suitability; component, system, and mission performance; technology optimization; personnel vulnerability; fire prediction and mitigation; nuclear hardening; cyber survivability; E3; and lightning.

TEST & EVALUATION Our T&E professionals are involved in all aspects of acquisition program support, including ballistic and nonballistic (to include Directed Energy and Cyber threats) developmental, operational, and Live Fire testing. We perform test planning, management, conduct, analysis, and reporting; and utilize the latest automated data collection tools, damage assessment processes, and weapon system databases.

MODELING & SIMULATION/ SOFTWARE ENGINEERING We have proven expertise with the latest M&S and software engineering tools and technologies. We work with many engineering and physics-based component-, system-, and force-level models; and our capabilities span from algorithm/methodology development to code design and low-level optimization to configuration management and VV&A support. We also develop customized user interfaces and computational tools for various applications.

DIMENSIONAL METROLOGY & REVERSE ENGINEERING We are uniquely positioned to offer specialized, high-precision metrology (i.e., measurement), modeling, and related services. These services include reverse engineering, target exploitation, rapid prototyping, dimensional inspection, pre- and post-test damage assessment, 3-D geometric modeling, TDP creation, parts obsolesce; metrology integration support and metrology tool application and development.

INFORMATION TECHNOLOGIES AND MANAGEMENT We are a repository and distributor of the nation's vital defense-related information. We acquire, archive, analyze, synthesize, and disseminate scientific and technical information. We develop and maintain classified and unclassified databases, supporting the community practitioners in a wide range of research, development, test, and evaluation efforts.

CAPABILITY STATEMENT

CORE COMPETENCIES

Program Management & Acquisition Support:
Hostile Environment Operations, CWMD Operations, Counter-IED Support, Force Management / Development, Personnel & Resource Management, Product Information Campaign, Operational Concept of Use, Market Assessment, SBIR/STTR and BAA Proposal Development

Cyber Operations / IT:
Knowledge Management, Technology Scouting & Identification, Technology Demonstration, Information Assurance, Portal Development & Maintenance, C4ISR, Electronic/Cyber Warfare, Data Collections/Mining, Information Security, Tier I, II, & III Support Services, and Software Development

Strategic Planning:
Engagement Roadmap, International Program Development, Operational Requirements Development, PPBES Development, Consequence Management, Risk ID and Mitigation, Program COA Assessment, Product Commercialization, Manufacture and Transition Planning

Testing & Analysis:
Test & Evaluation, Operational Analysis, Tactical Intelligence Analysis, Airworthiness Qualification, Nuclear/Biological surety, ORSA, IV&V Processes, Equipment Characterization & Safety Certification

Logistics & Training:
Field Service Tech Support, Mobile Training Teams, New equipment training, Classroom instruction, GOTS/COTS Equipment Management, Resource Management, Integrated Logistics Support

System Engineering:
Mission Command Networks and Systems (C4ISR), Counter-IED, Transformation Applications, Data Modeling, Operational / Technical / Systems View Development

MISSION

USI provides acquisition services for the Department of Defense and Industry to support System Life-cycle Management and Professional Support Services in the critical capability domains of CWMD, Technology Development, Un-manned Aviation, Cyber Operations/Information Technology, and Logistics Support

OUR SOLUTIONS

- Agile … The Way We Deliver
- Innovative … Creating from Visionary Ideas
- Enduring … Support for Today and Tomorrow

USmax CORPORATION

Your Trusted Mission Partner

OASIS SM

One Acquisition Solution for Integrated Services

What We Do

We protect American lives and property. We provide mission-critical, professional, converged IT and security services.

Global Mission Services

- Program/Project Management
- Business Process Management and Improvement
- Worldwide design, installation, and maintenance of information and security technologies
- Full lifecycle global logistics, and supply chain management
- Warehouse, inventory, and asset management
- Diplomatic Security (DS) and Overseas Security Policy Board (OSPB) based technical security services
- Experienced in National Electric Code (NEC), Foreign Affairs Handbooks and Manuals (FAH/FAM), and DS TSS standards

IT Acquisition, Modernization, & Consulting

- Enterprise architecture and business architecture
- Systems Engineering and Technical Assistance (SETA)
- Virtualization, cloud computing and IT consolidation
- Cloud implementation and migration strategies
- Infrastructure as Software
- IT service management
- Digital strategy
- Big data and data analytics

Cyber Security & Information Assurance

- Enterprise security, incident response planning & response
- Threat analysis, assessment, and continuous monitoring
- Certification and accreditation, assessment & authorization (A&A)
- IV&V, penetration testing, phishing campaigns

Why USmax

- Mission focused
- Financially responsible, zero-debt company
- Successful prime with large and small businesses as partners
- Project Management Office to support global service delivery
- Advanced demonstrator lab (iLab)
- DCAA approved accounting system
- Mature management capability to support complex requirements
- Attentive and accessible executive leadership team

Capability Statement for USAID

Vysnova Partners is a fast-growing program management firm that delivers a broad range of professional and technical services on a worldwide basis. Vysnova has nearly a decade of experience providing solutions to the Federal Government in the areas of Global Health, Life Science Research, Program Management, Government Acquisition, Workforce Development, and Monitoring & Evaluation. For USAID, our key programmatic capabilities include:

- Community Outreach and Engagement
- Data Collection and Analysis
- Data-driven Policy Development
- Economic Growth
- Monitoring & Evaluation (M&E)
- Program Management (Scrum, Agile, PDIA)
- Strategic Partnership Development
- Technology & Knowledge Transfer
- Theories of Change (ToC)
- Translational Research

We have supported the United States Agency for International Development through two large multi-country programs: the 2008-2013 **(MEASURE) DHS project** and the 2013-2018 **DHS Program.** These programs advance the global understanding of health and population trends in developing countries through surveys in nearly 100 countries and through the improvement of data collection, analysis, and visualization techniques. Using new and existing methods, we improved efficiency and reliability, demonstrated policy relevance, conducted data analysis, and monitored and evaluated activities.

USAID's Limited Excess Property Program (LEPP) supports sustainable, locally driven development endeavors, and promotes U.S. diplomacy efforts through productive partnerships with host governments and local institutions. LEPP works to strengthen local outcomes by providing federal surplus property to partners working in over 40 countries in Africa, Asia, Eastern Europe and Latin America and the Caribbean. LEPP partners utilize physical capital donations in their ongoing development objectives which include strengthening global health systems, humanitarian assistance, agriculture and education projects, as well as reinforcing Agency goals around local

Our Footprint and Impact

Built partnerships with private sector and academic institutions in Tanzania and Colombia to develop planning and entrepreneurial skills.

Conducted DHS Surveys (5,000-30,000 households) which provided data for a wide range of M&E indicators in the areas of population, health, and nutrition (PHN).

Developed 50+ solid partnerships with foreign government ministries, academic and research institutions, and non-profits.

Facilitated business and meetings with the Morogoro Miller's Association (Tanzania), the Sokoine Graduate Education Cooperative (SUGECO), the National Microfinance Bank, and the Vocational Education and Training Authority (VETA). This collaboration connected grant and micro financing aid with incubation opportunities and permitted current program beneficiaries to learn from other food processing programs.

Hosted 4,000+ attendees and beneficiaries at community outreach and engagement events in Tanzania, Haiti, and Guatemala. These events created awareness of disease outbreaks, nutrition, and maternal and neonatal health.

Recommended an actionable policy to subsidize food fortification for the prevention of neural tube defects in Tanzania and India. Vysnova developed this recommendation based on the ToC and data from 4- to 5-year programs.

Set up Project Offices in 9 countries in the span of 12 months, fully staffed with 100+ local talent staff. This includes post-conflict (Egypt) and post-disaster locations (Haiti).

Transferred knowledge of innovative methods to fortify wheat flour for 483 local producers in Tanzania, increasing product complexity.

Transferred technology and knowledge of computing skills to 6,000+ children through the donation of 2,800 computer units to 130 training centers, and to rural communities in El Salvador.

Our USAID Capabilities

About Williams Adley

Williams Adley brings to USAID relevant experience, qualified key personnel with Department of Defense clearances and required certifications, and a small business designation with excellent customer relationships. We are a nationally recognized certified public accounting and management consulting small business that has been serving Federal government clients for almost 40 years, and USAID for 20 years. We have conducted dozens of audits on behalf of USAID and its Missions, including audits of its implementing partners. We know USAID and its mission, operations, risks, and areas for growth and improvement.

Williams Adley's ability to quickly ramp-up project teams for domestic and international travel, our extensive experience auditing federal agencies with significant grant activities, and our in-depth knowledge of federal accounting and information systems makes us unequivocally qualified to provide financial management services in support of USAID's ongoing efforts.

Relevant USAID Past Performance

- **Audits of Overseas Missions and Headquarters:** Since 2001, utilizing an audit program provided by the USAID/OIG, Williams Adley has performed an average of 4 audits per year at mission offices located throughout the world. The scope of these audits included testing financial transactions, reviewing internal control processes, and assessing compliance with applicable financial and operational guidelines. We prepared a summary report for each mission audited and a consolidated report to summarize results from all missions. We also tested cycles at USAID headquarters that were part of the annual financial statement audit such as Fund Balance with Treasury, advances, budgetary resources, accounts payable, and others. Also, Williams Adley performed a detailed audit of the agency's $9 billion loan portfolio to determine whether the loan balances reported in the agency's general ledger accurately reflected the assets and potential liabilities of the agency, and whether adequate internal controls existed over the loan management activities of the agency.
- **Audit of Agency's Compliance with Federal Financial Management Improvement Act:** Assisted the Information Technology System Audit Group within OIG with an audit of the agency's compliance with FFMIA. We performed the audit based on the requirements of the Federal Information Systems Control Audit Manual.
- **Audit of General and Application Controls:** Supported the OIG with general and application control audits at select overseas missions. We focused on access controls over the agency's financial management systems.
- **Audit of Performance Measures:** Performed an assessment of selected mission's internal controls for monitoring performance indicators and in its determination of whether quality data was collected, maintained, processed, and reported in the mission's submissions.
- **Audits of FISMA Compliance:** On behalf of USAID/OIG, Williams Adley assisted the agency with Federal Information Security Modernization Act audits of USAID, Millennium Challenge Corporation (MCC), US African Development Foundation (ADF), and the Inter-American Foundation (IAF) information system security programs.
- **Audits of Costs Incurred under USAID Awards:** Conducted several incurred costs audits on behalf of USAID/OIG, USAID/Nigeria and USAID/Afghanistan. We assessed whether the awardees had sufficient internal controls to manage contract funds and had otherwise complied with applicable Federal statutes, regulations and policies.
- **Audits of Other Agencies Under the Purview of the OIG:** Williams Adley has performed financial statement audits of MCC, ADF, and IAF on behalf of the OIG. These audits included testing financial transactions, reviewing internal control processes, assessing compliance with applicable financial and operational guidelines, and reporting on the fair presentation of their financial statements.

Williams Adley's Capabilities

- Examinations
- IT Risk Management Services
- Grants Management
- Pre-Award and Capacity Audits
- Other Post-Award Audits

PSC: AC21, AC24, AC25, AC26, AC66, AR14, AR16, AR24, AR25

WPL, Inc. (WPL), founded in 1978, is a qualified Small Business with an experienced staff of systems and security engineers that support multiple technical efforts across the Department of Defense (DoD). Our core expertise lies in Military Satellite Communications (MILSATCOM) and Nuclear Command, Control, and Communications (NC3).

CORE CAPABILITIES:

Systems and Security Engineering Support for the space, ground, and terminal segments of the Milstar, Advanced Extremely High Frequency (AEHF), Enhanced Polar System (EPS) and EPS-replacement systems.

Operational Support: Evaluate mission effectiveness of SATCOM and Terrestrial systems and provide technical architecture consultation for NC3 systems, operational configurations, and specialized studies.

Training: Develop and administer materials, and courses for operations of Milstar and AEHF communication planning systems.

Sustainment Engineering: Apply extensive experience to day-to-day operations, sustainment, interoperability, and integration of current and future MILSATCOM, NC3, and Cryptographic Systems architectures and capabilities.

Systems Approach: Investigate and resolve issues using a broad understanding of SATCOM satellite, terminal, and control systems; including baseband equipment, database and planning information.

Integration and Testing: Support integration, test, and sustainment of current and future AEHF/MILSATCOM terminals and subsystems within both a laboratory environment and operational mission locations.

Technical Consultation for Operations: Support effective development of Allied, Coalition, and NATO architectures and concept of operations.

Identification and resolution of current operational and proposed future MILSATCOM and NC3 Systems' architecture gaps, interoperability and integration challenges and potential problem areas.

Assessment and analysis of MILSATCOM and NC3 system modifications, enhancements, maintenance, and advanced programs. To include evaluating potential impacts of technology insertion on systems, operations, system architectures, and mission effective capabilities.

Emerging Mission Support: Ability to develop, manage, and implement solutions for complex architectures. WPL is leading the effort of a Future North Atlantic Treaty Organization (NATO) protected SATCOM architecture. Beginning with concept development, through systems design, to fielding of a multi-service/multi-national capability.

International Partners (IP) Operational Support: Support IP on training, use and engineering of AEHF operationally focused services utilizing the Mission Planning Element (MPE) and other engineering tools locally developed. Support includes the operations of Navy Multiband Terminal (NMT) and Secure Mobile Anti-Jam Reliable Tactical-Terminal (SMART-T).

About Us

WTI currently has a presence across multiple states throughout the country supporting both Department of Defense (DOD) and Civilian customers. As an ISO 9001:2015, ISO 20000:2011, and ISO 27001-1:2013 certified and CMMI® for Development Level 3 (CMMI-DEV L3) and CMMI® for Services Level 2 (CMMI-SVC L2) appraised company, WTI’s talent acquisition and innovative Information Technology (IT) solutions and support services are shaped on industry, program management, and quality management best practices. WTI brings a proven performance track record in Program Management, Artificial Intelligence, Application Development, Data Analytics, Internet of Things, User Experience, Big Data, Cloud & Virtualization, Management Consulting, Cyber Security, and Business Automation services.

Prime Contract Vehicles

- GSA OASIS SB Pool 1: 47QRAD20D1077
- GSA 8(a) STARS 2: GS00Q17GWD2465 (as managing partner of Digital MindTrust)
- Army Virtual Learning Environment (AVLE) IDIQ
- HHS PSC Intelligence Automation/Artificial Intelligence (IAAI) IDIQ (as managing partner of Intelligence, LLC)
- Special Operations Forces Core Support Services IDIQ, USSOCOM

Client Base

- Air Force
- Army
- DISA
- HHS
- NRC
- NOAA
- USCIS
- USAGM
- USPTO
- SOCOM
- Department of State
- FEMA

Core Capabilities

- Artificial Intelligence
- Business Intelligence
- Big Data Processing
- DevOps
- Data Visualization
- Application Development
- Training
- Blockchain

X Technologies, Inc.

About Us:

X Technologies is a leading technology services provider for the DoD and has a proven track record of providing a wide variety of services, products, and technology solutions across the life cycle phases of multiple Air Force Weapon Systems. X Technologies has delivered a wide array of system engineering and development to include Program Management (PM), Trade Space and Capabilities Studies, Demonstrations and Test, Hardware and Software (HW/SW) modifications, Fabrication and Manufacturing, and Logistics support for the DoD and various commercial clients since 1998 as both a prime contractor and as a subcontractor. Additionally, we have over 10 years of experience delivering Identity Credential and Access Management-related support to various DoD clients.

Contract Information:

- o GSA OASIS SB Pool 3 - GS00Q14OADS341
- o NITAAC CIO-SP3 - 75N98120D00112
- o NAVAIR PASS-SB - W15QKN18D0062
- o SeaPort-NxG - N0017819D8850
- o Air Force CCSD FIA2T - FA830717D0005

- o GSA PSS - 47QTRAA18D00EY

NAICS Codes:

- o 541330
- o 541511
- o 541512
- o 541519
- o 541690
- o 541990

Client Base:

- o Air Force Cryptologic and Cyber Systems Division (CCSD)
- o Defense Information Systems Agency (DISA)
- o Air Force Air Logistics Centers (ALCs)
- o Naval Air Systems Command (NAVAIR)
- o United States Marine Corps (USMC)
- o U.S. Transportation Command (USTRANSCOM)

Core Capabilities:

- o Identity & Access Management (IdAM)
- o Risk Management Framework (RMF)
- o Life Cycle Logistics Support
- o Hardware & Software Development
- o Automatic Test Equipment (ATE)
- o Reverse Engineering & Specialized Repair
- o Prototyping & Build-to-Print
- o System Administration
- o Key Management
- o Program Management
- o Acquisition Support
- o Sustainment
- o Test & Evaluation
- o Test Program Sets (TPS)

Certified Professionals:

- o Certified Information Systems Security Professional (CISSP)
- o Project Management Professional (PMP)
- o Scaled Agile Framework (SAFe)
- o Information Technology Infrastructure Library (ITIL)
- o CompTIA Security+
