We apply innovative thinking to deliver a full spectrum of services in a global context. Our service offerings include:

- Communications and KM
- Data analysis and visualization
- Data science and machine learning
- Digital strategy and digital transformation
- Gender and social inclusion assessments and technical assistance
- Human-centered design (HCD)
- Information technology, software development and cloud computing
- MEL
- Modernized learning
- Qualitative and quantitative data collection
- Strategy and theory of change development
- Training and facilitation

BIXAL

Service Offerings

- Strategic Communications
- Learning & Knowledge Management
- Agile Development
- Customer Experience Design
- Data Science & Analytics
- Cloud Computing

Our Experience

USAID/Resilience and Food Security Bureau Feed the Future Knowledge, Data, Learning, and Training (KDLT)

Supporting USAID Operating Units and Missions to expand knowledge capacity

Bixal leads the five-year KDLT activity using several innovative approaches, including Agile methodologies and human-centered design, to sustainably reduce global hunger, malnutrition, and poverty. KDLT helps USAID stay connected through webinars and Agrilinks.org and Resiliencelinks.org to make learning and strategic information easily accessible regardless of location.

USAID/Global Health Supply Chain Program (GHSC)–Procurement and Supply Management

Improving communications for health commodities

Bixal designed and developed GHSupplyChain.org, which plays a crucial role in achieving broader global health engagement efforts through global collaborations, advocacy, market dynamics, knowledge management communications. The site includes an interactive data visualization tool of the 2017 and 2019 contraceptive security indicators survey.

USAID/Vietnam, Trade Facilitation Program

Helping increase Vietnam's local capacity and improve its trade competitiveness

Bixal builds training capacity of customs officials in Vietnam with a modernized learning approach to e-learning and instructional design. Using human-centered techniques, Bixal conducted an e-learning feasibility study with the Vietnam Customs School before developing and testing an e-learning pilot course with Vietnamese customs officials, and then advised on the activity design and procurement of a local firm to build an online learning management system.

Millennium Challenge Corporation (MCC)/Government of Lesotho (GoL)

Assessing root causes of Lesotho's high HIV prevalence rate

Bixal supported the health system strengthening due diligence for the second Compact in Lesotho. Bixal led the analysis of the Ministry of Health's financial management and community health programs and developed recommendations for the Compact. The team also supported the development of the budget for the Compact and the Monitoring and Evaluation plan. The work included extensive document review, qualitative and quantitative data analysis and reporting. Bixal assessed current and past donor projects and government policies that address HIV prevalence and provided potential recommendations for health system improvements.

United Nations (UN) Foundation/Digital Impact Alliance (DIAL)

Supporting the promotion of Digital Principles and technology adoption in Colombia, Kenya, and the U.S.

Bixal, formerly Clear Outcomes, led a formative evaluation of the need for and modality of training for the Principles for Digital Development among selected digital stakeholders, with an emphasis on bringing together non-traditional voices. Using HCD principles, the team conducted primary data collection and secondary research to understand trends, exploring best practices and lived experiences to make digital technology easier for development practitioners to incorporate into service delivery programming.

UNICEF/Ghana Education Service's Quality Kindergarten Scale-Up Programme

Transforming Ghana's early childhood education programming and learning outcomes at every government level

Bixal, formerly Clear Outcomes, performed an evaluation to identify necessary adaptions of a project providing national systems support, district systems strengthening, and school level improvements to kindergarten programs and learning outcomes. This evaluation allowed for relevant and effective recommendations via the analysis of primary and secondary data from sources including target beneficiaries, classroom observations, and key informant interviews.

D&G Support Services

Mission

To deliver best-in-class support and solutions to our Nation's Warfighters and First Responders. We execute this mission through a "One Team - One Fight" approach that maximizes each individual's capabilities and contributions to our team.

Award Winning Team

D&G is consistently recognized at the highest levels for our expertise and outstanding support.

- DHS Secretary PM of the Year Award - USCG Small Vessel Standoff Detection (SVSD)
- Director Defense Logistics Agency (DLA) Award - Defense Manufacturing Technology SBIR Program
- Secretary of the Army IT Program of the Year Award - ASA(ALT) Acquisition Business/Data Analytics
- DHS Secretary PM of the Year Award - Integrated Fixed Tower (IFT), Remote Video Surveillance System (RVSS)
- DHS CWMD Acquisition Team of the Year Award - Human Portable Tripwire (HPT) Program

Centers Of Excellence

Full Life Cycle Acquisition
D&G personnel are subject matter experts in executing DHS and DoD Programs across all phases of the DHS 102-01, DoD 5000, and Systems Engineering Life Cycle (SELC). Our employee qualifications include the highest level DAWIA, DHS, and PMP certifications.

Integrated Logistics Support
D&G's logistics expertise includes the logistics planning and sustainment of numerous systems deployed across CONUS and OCONUS AORs. Expertise includes developing Integrated Logistics Support Plans (ILSP), Materiel Fielding Plans (MFP), and Process/Desk Guides for USCG, CBP, and DoD Systems.

IT / Cyber / Data Analytics
D&G supports multiple clients with Information Technology (IT) services to include leading the implementation of DLA's J68 Azure Development Environment (DADE) and supporting CWMD CIO's Network Operations, Information Assurance, and Communications Infrastructure. We also provide Cyber Capability Analysis and Data Analytics Support for USCG.

CWMD / CBRN
D&G has successfully supported DHS CMWD/DNDO since 2011, working with CBP, USCG, TSA, USSS, DARPA, DTRA, JPEO-CBD, DOE, and State/Local Law Enforcement/First Responders. Expertise includes threat assessments, modeling and simulation, systems development, systems integration, test & evaluation, training, and fielding of multiple CBRN systems and capabilities.

- DoD: ARL, INSCOM, SEAPORT NxG
- DHS: CWMD, CBP, I&A
- DIA: JOIC-K, SIA 3
- Civilian: DOE TEPS, CDC OPHPR

*Multiple Contracts, Not all inclusive

Highlighted Success

United States Coast Guard (USCG)
Small Vessel Standoff Detection (SVSD)
D&G personnel were recognized as the DHS Secretary PM of the Year Award for their support of the USCG SVSD Program, a joint effort between the DHS DNDO, USCG, and CBP. Support spanned the entire DHS 102-01 Acquisition Life Cycle including requirements development, systems integration, and operational testing at Galveston, TX, St. Augustine, FL, and Sequim, WA.

United States Customs & Border Protection (CBP)
Logistics and Fielding
D&G Logistics personnel working with CBP (OBP, OFO, OTD, and ILB) implemented the highly successful fielding, training, and sustainment plan for the Basic Handheld System which included Level of Repair Analysis (LORA) and early maintainability demonstrations. The program resulted in a significant reduction in O&M costs and the ability to track key logistics-related performance metrics for over 3,000 systems.

Defense Logistics Agency (DLA)
Azure Development Environment (DADE)
D&G's support to DLA includes multiple J3 and J6 divisions and all R&D Programs to include, DLA J68's DADE initiative. DADE will allow DLA, Services, and Industry to collaborate on application development in a secure environment with the capability to validate the performance and data analytic capabilities of next-generation distribution and sustainment algorithms against actual warfighting data.

Countering Weapons Mass Destruction (CWMD)
Human Portable Tripwire (HPT)
D&G provided primary technical and acquisition support to the DHS CWMD HPT program which included Cooperative Research & Development Agreements, Operational Pilots, tailoring of the Systems Engineering Life Cycle, and Limited Characterization to accelerate the fielding of Commercial-off-the Shelf Rad/Nuc Detection Systems throughout the United States.

CAPABILITIES

Program Management Services

Program Management Services includes all services related to leading, facilitating, and ensuring the strategic planning, implementation, coordination, integration, and evaluation of programmatic activities and administrative systems.

Services that we provide under the Program Management Services discipline include, but are not limited to, the following:

- Acquisition Support
- Cost/Schedule/Performance Analysis
- Cost Estimation and Analysis
- Cost/Performance Trade-Off Analysis and Studies
- Earned Value Management (EVM) Analysis
- E-Business Support
- Information Analytics
- Program Management
- Integrated Program Management
- Program Documentation
- Project Management
- Risk Assessment and Mitigation
- Integration of Support Systems
- Planning, Programming, Budgeting, and Execution Processes
- Capabilities Integration and Development
- Manpower Estimating
- Stakeholder Requirements Analysis
- Decision Analysis
- Technical Planning
- Technical Assessment
- Requirements Management
- Risk Management
- Configuration Management
- Technical Data Management
- Interface Management

Management Consulting Services

Management Consulting Services includes all services related to the practice of helping organizations improve their performance, primarily through the analysis of existing organizational problems and development of plans for improvement.

Services that we provide under the Management Consulting Services discipline include, but are not limited to, the following:

- Business Process Reengineering
- Business Case Development Support
- Change Management
- Concept Development and Requirements Analysis
- Cost/Schedule/Performance Improvement
- Information Analytics
- Knowledge Management
- Tactical and Readiness Planning
- Technical Advisory Services
- Training and Facilitation
- Strategic Planning
- Strategic Forecasting
- Long-Range Planning, Futures, and Forecasting
- Strategy Development

Scientific Services

Scientific Services includes all services that are primarily involved in the application of comprehensive scientific and professional knowledge in planning, conducting, evaluating, and managing fundamental research, knowledge enhancement, and/or technology development and innovation.

Services that we provide under the Scientific Services discipline include, but are not limited to, the following:

- Engineering Sciences
- Physical Sciences

Engineering Services

Engineering Services includes any service or creative work, the adequate performance of which requires education, training, and experience in the application of engineering principles.

Services that we provide under the Engineering Services discipline include, but are not limited to, the following:

- Systems Engineering
- Advanced Technology Pilots and Trials
- Configuration Management
- Concept Development
- Design Documentation and Technical Data
- Engineering (Aeronautical, Astronautical, Electrical, Mechanical)
- Engineering Process Improvement
- Independent Verification and Validation
- Integration
- Interoperability
- Modeling and Simulation
- Prototyping and Fabrication Support
- Quality Assurance
- Requirements Analysis
- System Design
- System Integration
- System Safety Engineering
- Test and Evaluation
- Technical Documentation
- Mission Assurance
- Data Analytics
- Architecture Design
- System Verification and Validation
- Baseline (Configuration) Management
- Data Management
- Risk Management
- Technical Planning
- System Security and Information Assurance
- System Effectiveness and Analysis
- Launch Processing and Verification
- Software Development (for non-IT requirements)
- Software Independent Verification and Validation (for non-IT requirements)
- Radar Engineering
- Optical Engineering
- Communications Engineering

Financial Management Services

Financial Management Services includes the planning, directing, monitoring, organizing, and controlling of the monetary resources of an organization.

Examples: Services that we provide under the Financial Management Services discipline include but, are not limited to, the following:

- Budget Analysis and Tracking
- Business Information Services
- Cost Estimating and Analysis Support
- Cost Performance Risk Assessments
- Disbursement and Reconciliation Support
- Financial and Financial Risk Analysis
- Financial Management, Accounting, and Auditing Services
- Impact Statement Development
- Program Management for Financial Services
- Program Objective Memorandum (POM) Creation And Documentation
- Oversight and Fraud Detection
- Safeguarding Personal Data
- Economic Analysis
- Return on Investment Analysis
- Life Cycle Cost Determination
- Total Ownership Cost Determination
- Affordability Analysis
- Analysis of Cost Alternatives
- Should-Cost Determinations

334511	Search, Detection, Navigation, Guidance, Aeronautical, and Nautical System and Instrument Manufacturing
336413	Other Aircraft Parts and Auxiliary Equipment Manufacturing
336419	Other Guided Missile and Space Vehicle Parts and Auxiliary Equipment Manufacturing

TERASENSE

TeraSense is an IT Modernization firm

Our solutions modernize critical mission applications and systems.

TeraSense is comprised of domain subject matter experts committed to providing advanced solutions which elevate our customers in achieving their mission. Our professionals leverage industry best practices to design, develop, integrate, and deploy complex systems and software solutions for our mission partners.

SBA U.S. Small Business Administration 8(a) Certified | HUBZone Historically Underutilized Business Zone | CMMIDEV/3 CMMISVC/3 | ISO 9001:2015 CERTIFIED COMPANY

CUSTOMER CENTRIC MISSION SOLUTIONS

Technical Capabilities

Agile DevSecOps

TeraSense agile processes lead to rapid delivery, adapt to changing requirements, and achieve faster time to deployment while decreasing programmatic risk.

Cloud Solutions

Our team builds cloud solutions that integrate the right platforms, technologies, and cloud services to optimize infrastructure security, scalability, and availability.

Cybersecurity

TeraSense engineers build end-to-end security solutions to advance our national security and protect our domestic infrastructure.

Systems Engineering

TeraSense systems engineers are committed to the design, development, testing, and deployment of fully operational systems to ensure systems readiness.

Professional Services

TeraSense professionals support our federal partners with programmatic oversight, management consulting, and information technology support.

About Us

TeraSense was founded with a vision to advance customer capability through the design, development, integration, and deployment of mission critical systems and software solutions.

Through focused customer engagement and awareness of an evolving technology landscape, TeraSense has evolved into an IT Modernization firm. Our professionals leverage industry best practices and emerging technologies to create trusted digital solutions. Our team is successful in supporting our customers in meeting their objectives which are aimed to:

- Advance National Security
- Secure Domestic Infrastructure
- Optimize Mission Capability
- Enhance Civic Engagement

Mission Driven IT Modernization
STEM Technical Development

Cloud Engineering DevSecOps

TeraSense supports TRADOC G6 with Agile DevSecOps. Our team builds flexible, scalable, and secure software solutions with consistent, deterministic provisioning, and configuration management. Processes and standard operating procedures are captured as code which is placed under version and change control. The resulting infrastructure-as-code provides operational agility by automating processes.

The deterministic nature of a fully automated DevSecOps solution also lends itself to consistent, fine-grained security controls. Tenets of the zero trust framework like micro segmentation can be leveraged with little to no operational overhead. Because controls and their associated policies are captured as code, they can be continuously audited and verified via automated scripts.

Enterprise Defensive Cyber Operations

DEVCOM C5ISR CENTER

TeraSense is working with CrowdStrike to build and deliver a Managed Threat Hunting and automated CND/DCO Maneuver Service for DoD Enterprise Defensive Cyber Operations. The focus of this effort is to shift from computer network defense to actual DCO Maneuver with adversary identification and breach prevention. TeraSense is partnering and integrating managed security services with Crowdstrike's Falcon Platform to automate key DCO functions across endpoint, cloud, mobile, and network perimeters.

The advantage of our approach is a unified and lightweight delivery model via SaaS paired with high-value Terasense DCO operators and threat analysts to provide immediate time-to-value, better performance, reduced cost and complexity, and advanced protection beyond traditional signature based cybersecurity to stop breaches.

TeraSense Jumpstart

DEVCOM ARMY RESEARCH LABORATORY

TeraSense's Jumpstart Program provides STEM students access to cutting-edge Cybersecurity, Systems Engineering, and Software Engineering projects. TeraSense leadership takes an active position in Baltimore City community outreach, specifically targeting minority institutions (Bowie State, PG County, UMD-CP, UMBC) to recruit and cultivate the next generation of STEM talent.

Our goal is to strengthen the networks, relationships, and resources that connect academia, industry, and government agencies to facilitate the development of the next generation of STEM talent. Through this approach, our team is able to facilitate the exchange of scientific ideas, impart technical knowledge, and carry out an impactful outreach program to cultivate curiosity and technical talent.

SERVING THOSE THAT SERVE THE NATION

Our cause, our northstar, our very reason for existence is to deliver mission readiness to the Federal Government and Department of Defense – most critically focused on – the soldier, airmen, sailor and marine who proudly go above and beyond to protect and serve. Our very existence is predicated on our ability to ensure their safety and readiness. We understand mission readiness as a measurable, reliable sense of preparedness. We know what achieves it. We know what prevents it. We accelerate our customers towards mission readiness through our suite of services and custom, situational solutions – all while staying true to our organizational core values.

The Lockwood Group delivers mission readiness.

A CULTURE OF SERVICE

We believe that living our core values is critical not just to our success, but our customers' too.

ETHICS AND INTEGRITY

At Lockwood, we do what's right always with integrity, honesty and centered around the right ethical principles. We are proactive and diligent in maintaining this ensuring our customers, workforce, and partners are all on the same page.

CUSTOMER COMMITMENT

We seek to exceed our customer's expectations. We always act in their best interest being the problem solvers that they come to trust and rely on.

TEAM AND FAMILY ENVIRONMENT

Founded by a family, we take pride in family and seek to create a team environment that feels like family. We treat each other with the same level of care, honesty, respect, comfort, and compassion you would for a loving family member.

SERVICE

We aspire to serve our nation, our community, our families and each other. We invest our time and resources to support causes that enhance well-being and improve our country.

LEADERSHIP

We seek to hire highly capable people whom we trust, providing a work environment for them to independently thrive, grow and lead. We enable a "Best idea wins" culture enabling everybody to share their ideas and take smart risks.

POSITIVITY

We seek to create a supportive environment centered around encouragement, gratitude, and positivity. We are designing a workplace where everybody truly enjoys going each and every day surrounded by supportive colleagues, friends, and family.

SERVING THE CUSTOMER. SOLVING THE PROBLEM.

We deliver the services within the domains of Aviation, C5ISR and Cyber that power our solutions that drive our customers towards mission readiness.

- Digital Transformation
- Enterprise Resource Planning
- Supply Chain Management
- Systems Engineering
- Technology Modernization

- Cyber Security
- Education and Training
- Integrated Logistics Support
- Logistics Product Development
- Predictive Analytics

- Advisory and Assistance
- Design Interface
- Life Cycle Cost Management
- Program Management
- Systems Engineering Technical Assistance

THE LOCKWOOD GROUP

INTEGRATED PROJECT MANAGEMENT PROCESS (IPMP)

Reduce project uncertainty, mitigate risk and drive visibility through a centralized, integrated, technology-driven project management framework.

INTEGRATED INSTRUCTIONAL DESIGN (IID)

Solve for key system disconnects through the application of the PADDIE+M process while integrating functional experts within the development process to ensure training meets real-world requirements.

LOGISTICS READINESS IMPACT (LRI)

Plan logistics from an enterprise point-of-view to drive down operating and support costs while improving mission readiness.

FIRST TIME READINESS SOLUTION (FTR)

Achieve system mission readiness through a lean, single process approach to the development of logistics products – from training manuals and support packages to provisioning bill of materials and maintenance allocation charts.

INNOVATION HUB

SERVICES TO ALIGN WITH THE FUTURE OF MISSION READINESS

The Lockwood Group's innovation hub builds our services to align with the future of Mission Readiness. We welcome the opportunity to discuss our findings with you.

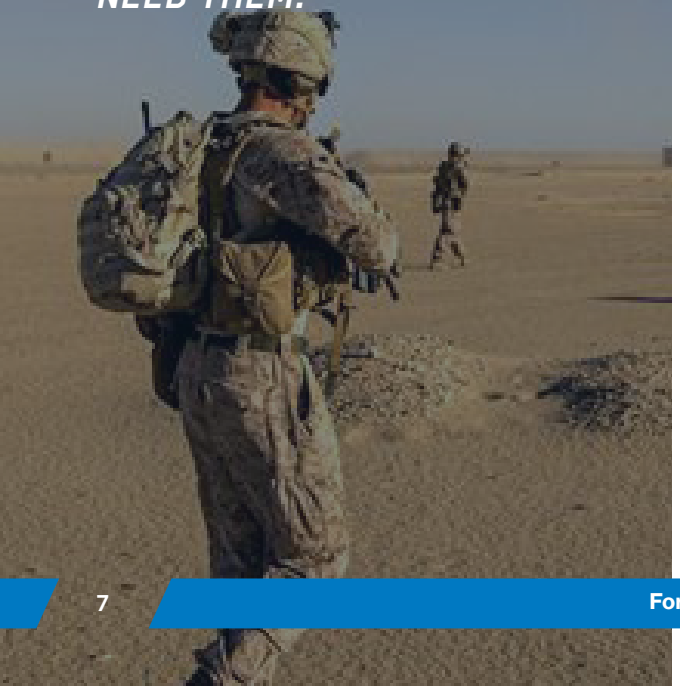
PREDICTIVE ANALYTICS AND MAINTENANCE

AI AND ROBOTIC PROCESS AUTOMATION

KNOWLEDGE MANAGEMENT

GAMIFICATION IN TRAINING

THE LOCKWOOD GROUP HOLDS A VARIETY OF CONTRACT VEHICLES THAT OFFER OUR GOVERNMENT CLIENTS THE SPEED, FLEXIBILITY AND SELECTION THEY NEED TO PROCURE OUR TRUSTED SOLUTIONS. THE RESULT IS OUR GOVERNMENT CLIENTS RECEIVE THE SERVICES THEY NEED, WHEN THEY NEED THEM.



Professional Services Schedule (PSS)

The PSS consists of seven formerly separate schedules that were consolidated in 2015 to give federal agencies a streamlined way to obtain professional services using a single contract vehicle. Lockwood's PSS covers a broad range of professional services.

Army Aviation And Missile Command Expedited Professional and Engineering Support Services (Amcom Express)

The AMCOM EXPRESS Program is a group of multiple-award Blanket Purchase Agreements (BPA) leveraging commercial processes and innovative enhancements established within the "evergreen" aspects of the General Services Administration (GSA) schedules program.

One Acquisition Solution For Integrated Services (Oasis) Pool 1

GSA One Acquisition Solution for Integrated Services (OASIS) Small Business is a government-wide multiple award IDIQ vehicle with 7 pools spanning across 28 NAICS codes and 6 NACIS code exceptions for providing professional, scientific, and technical services.

One Acquisition Solution For Integrated Services (Oasis) Pool 3

GSA One Acquisition Solution for Integrated Services (OASIS) Small Business is a government-wide multiple award IDIQ vehicle with 7 pools spanning across 28 NAICS codes and 6 NACIS code exceptions for providing professional, scientific, and technical services.
