Chemonics International Contractor Capabilities
One Acquisition Solution for Integrated Services (OASIS)

Founded in 1975, Chemonics is one of the world's leading international development consulting firms. In 82 countries around the globe today, our network of more than 5,000 specialists pursues a higher standard in development to help clients, partners, and beneficiaries achieve results. Chemonics holds the OASIS Pool 1 unrestricted contract.

Program Management Services

Chemonics is known for its ability to manage complex programs in the world's most challenging environments. Our ISO 9001:2008-certified quality management system serves as the backbone of our program management, ensuring efficient, integrated, client-centered support across all aspects of program management, from technical assessments to regulatory compliance, and all phases of the lifecycle, from planning to evaluation.

Management Consulting Services

Strengthening the capacity of public and private institutions is fundamental to Chemonics' work. Our experts help government ministries, municipal governments, civil society organizations, private businesses, and many others with the analysis, planning, training, systems, and change management needed to reach optimal performance.

Logistics Services

Our multi-sector supply chain practice works with local stakeholders to transform their supply chain performance with solutions by designing, tailoring, testing, and scaling proven technologies and innovations optimized to work in the most complex environments. Our dynamic portfolio of long-term projects adapts data-driven private sector practices to build resilient supply chains that have world-class efficiency, ease of use, and last-mile reach.

Engineering Services

We help design and facilitate sustainable infrastructure solutions, conduct environmental impact assessments, support climate risk management, and apply engineering principles more broadly on our projects to generate innovative, technically sound solutions to the world's most intractable challenges.

Scientific Services

Chemonics embraces scientific methods in our research, knowledge management, and learning with the goal of scaling innovations for sustainable change. Through solutions labs, for example, we create an environment where experts from a wide range of backgrounds have the resources, opportunities, and freedom to co-create solutions.

Financial Management Services

Our experts are leaders grants management, budget forecasting, economic analysis, and public financial management. Chemonics manages more than $500 million in grants and helps our clients to increase budget transparency, structure transactions, prevent fraud, and use data to enhance financial management.

DAI – USAID
CAPABILITIES

DAI is an employee-owned global development firm based in Bethesda, Maryland. For more than 50 years, DAI has provided technical expertise, project management, and consulting services to USAID, the U.S. Government, and dozens of development partners around the world.

DAI
Shaping a more livable world.

DAI's mission is to make a lasting difference in the world by helping people improve their lives. We envision a world in which communities and societies become more prosperous, fairer and better governed, safer, healthier, and environmentally more sustainable.

As of January 2021, DAI implements 180 projects in 90 countries on behalf of 17 clients. For USAID alone, DAI currently implements 88 projects valued at $2.7 billion. Over the past five years, DAI has managed more than $200 million in grants under USAID-funded projects, including single-project grant portfolios as large as $58 million.

To support our clients, DAI relies on a global workforce of 5,700 staff, 70 percent of whom are from the countries in which we work. This long-term workforce is augmented by our global talent network of 60,000 consultants and technical experts. DAI maintains more than a dozen corporate offices worldwide and registrations in 50 countries, which enable us to respond quickly to a broad spectrum of technical and programmatic needs and operate seamlessly where USAID works.

DAI delivers USAID development results through short- and long-term programming supported by rigorous monitoring and evaluation. Through decades of experience implementing complex, multi-year USAID projects, DAI has field-tested systems and procedures to deliver efficient and compliant technical assistance, assessments, procurements, and grants under contract. In 2020, DAI adapted this experience to the COVID-19 context to lead 16 remote start-ups for new USAID projects.

DAI is committed to USAID's small business goals and supporting federal small business programs. In 2017, the USAID Office of Small and Disadvantaged Business Utilization named DAI its Large Business Partner of the Year. DAI's fiscal year 2020 small business utilization rate across our active USAID projects outperformed USAID's 2020 goal for small business utilization by 24 percent.

Deloitte.

OASIS Program Overview

What is OASIS?

One Acquisition Solution for Integrated Services (OASIS) is a General Services Administration (GSA) issued, awarded, and managed Multi-Agency Contract vehicle (MAC) that provides clients across the Federal Government with easy access to complex professional services requirements. The OASIS program gives Federal agencies access to pre-qualified awardees of two separate contracts: OASIS Unrestricted, and OASIS Small Business (SB). GSA awarded Deloitte the OASIS Unrestricted contract for Pool 1 (Engineering and Consulting Services) and Pool 2 (Financial Services) in September 2014. GSA awarded Deloitte the OASIS Unrestricted contract for Pool 3 (Military/ Marine/ Energy Engineering Services) and Pool 4 (Scientific Research and Development (R&D) Services) in September 2020.

OASIS Process

How does OASIS contracting work?

OASIS Benefits

Why choose OASIS?

- Established with unprecedented industry engagement
- Cream-of-the-crop pre-vetted contract holders who have met extensive and thorough past performance criteria
- Longer term planning with up to a 10-year Period of Performance
- Customers given an option of using experienced Assisted Acquisition Services (AAS) or their own Procurement Office after receiving a Delegation of Procurement Authority (DPA) from GSA
- Flexibility in contract type at task order level
- Unlimited ceiling

Deloitte and GSA OASIS Unrestricted

Simply put, a significant portion of Deloitte's core service offerings fit within the OASIS Pool 1, 2, 3, or 4 scope. OASIS provides any Government client across mission spaces the opportunity to work hand-in-hand with a tested, trusted provider.

Our Work across Mission Spaces

Protection and Defense. We provide a range of services, from DHS policy support, to State Department cost estimation work, to DOJ anti-money laundering financial work.

Quality of Life. We have served clients in this space with $600 million+ Oracle upgrades, Veteran-focused customer experience initiatives, and overseas governance projects.

Commerce. We are a committed collaborator in the Federal commerce space, providing program management to DOT transit projects around the country, and earning an award as an outstanding mentor contractor in the Treasury's mentor-protégé program.

Natural Resources. We have helped USDA's National Finance Center establish itself as a premiere service provider to other Federal Agencies, and collaborated with DOI through the Open Government Partnership.

Pool 1: Engineering and Consulting Services – NAICS

- 541330 Engineering
- 541360 Geophysical Surveying and Mapping Services
- 541370 Surveying and Mapping (Except Geophysical) Services

Deloitte.

OASIS Scope

When would OASIS provide a good contracting fit?

OASIS responds to complex professional services needs in a broad range of disciplines, including:

- Program Management
- Management Consulting
- Financial Services
- Engineering Services
- Scientific Services

Pool 3: Military/ Marine/ Energy Engineering – NAICS Codes

- 541330 Engineering Exception A Engineering for Military and Aerospace Equipment and Military Weapons
- 541330 Engineering Exception B Engineering for Contracts and Subcontracts for Engineering Services Awarded Under the National Energy Policy Act of 1992
- 541330 Engineering Exception C Engineering for Marine Engineering and Naval Architecture

Pool 4: Scientific Research & Development – NAICS Codes

- 541713 Research and Development in Nanotechnology
- 541714 Research and Development in Biotechnology (except Nanobiotechnology)
- 541715 Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and

*What does **"complex"** mean?*

Customers' requirements may be well-served by OASIS if they are:

- Requirements that contain multiple disciplines
- Requirements that contain significant IT components, but are not driven by IT requirements
- Requirements that contain Other Direct Costs (ODCs)
- Requirements that need to be performed on a cost reimbursement basis
- Require easy access to services and quick-turnaround
- Require an allowance for ancillaries/ODCs at the task order level
- Require all types of procurement, including cost reimbursement
- Looking for continuous improvement – OASIS program office is continuously monitoring customer needs; there is opportunity to refresh vendor pool as needs arise

Connect with OASIS Resources

Please visit www.gsa.gov/oasis for information such as:

- A customer ordering guide
- Registration information for the 90-minute Delegated Procurement Authority (DPA) training required for those customers that choose not to outsource contracting under OASIS
- Information on contractors and NAICS codes by pool
- Contract holders by pool
- OASIS training
- RFP solicitation templates

FORS MARSH GROUP, LLC (FMG) combines the power of science and strategy to improve people's lives. Each day, we work with organizations that seek to disrupt markets, understand or influence behavior, drive action on a global scale, and create a positive impact on the world. Since our founding in 2002, we have successfully completed hundreds of large-scale and highly visible research projects. We have developed multi-million dollar strategic communication campaigns (incorporating qualitative and quantitative research components), designed and developed training efforts for federal employees, administered surveys to more than 450,000 participants, and created communication plans and outreach products for various causes. We help clients evaluate, reinforce, and change their target audiences' behavior to positively impact their day-to-day lives. Our team is made up of individuals with extensive training in communication, psychology, economics, statistics, public policy, computer science, and human factors.

Guidehouse LLP
Contract GS00Q14OADU216
Unrestricted Pool 2

Guidehouse is a diversified independent consulting firm headquartered in Washington, DC, with over 8,000 professionals spanning more than 50 locations globally. Our consultants serve our public and private sector clients applying a depth of industry knowledge, robust technical expertise, and an enterprising approach to support clients in the public and private sectors. Our work spans regulated markets and sectors including dedicated segment groups for Healthcare, National Security and Defense, Financial Services, and Energy, Sustainability and Infrastructure.

Guidehouse provides a wide array of business and technical services for international development clients to improve operational performance, implement against development objectives, and measure results. Our work spans assignments for USAID, Millennium Challenge Corporation, Department of State, the World Bank Group, European Bank for Reconstruction and Development, the German Development Bank (GiZ), European Union, and others. We are dedicated to brining industry leading practices to deliver on our clients' most pressing challenges.

Improving operational performance. Guidehouse offers a wide array of business and technical consulting services focused on helping our clients solve their biggest challenges –while keeping their missions and people at the forefront of those solutions.

Program Management

Perform full-service project and program management support, including communications, schedule, risk, and budget management.

Strategic Planning

Develop strategic goals, objectives and measures, and align processes and structure to support strategy implementation.

Technology & Data

Support Information Technology strategy development and implementation, and provide data quality improvement and analytics support.

Organizational Assessment

Assess organizational effectiveness and provide recommendations for improvement.

Program Evaluation

Evaluate programs and provide tools and support to improve State's ability to make informed programming and investment decisions.

Change, Learning & Transformation

Support implementation of organization-wide initiatives designed to make a lasting change to operations.

Delivering on your mission. Drawing on market-leading commercial capabilities in Energy and Health, Guidehouse also partners with USAID and other development agencies to provide leading solutions and access to a broad variety of technical talent focused on your mission. See reverse side for details.

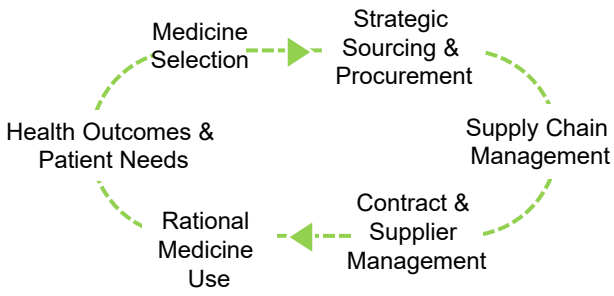
Guidehouse LLP
Contract GS00Q14OADU216
Unrestricted Pool 2

Delivering on your mission. Guidehouse is a proven advisor for development and diplomacy organizations providing a broad variety of technical capabilities to help address social and economic constraints. Our teams offer deep experience advising on and implementing programs to improve health outcomes and expand access to clean and reliable energy.

Global Public Health

Guidehouse delivers services across the entire medicine value chain including drug and device selection, strategic sourcing procurement, supply chain management, contract management, and monitoring & reporting health outcomes



Our Public Health Supply Chain practice leverages a commercial supply chain ethos to deliver solutions spanning the end-to-end health supply chain. We help our clients by developing and operationalizing strategy, optimizing processes and organizational design, and implementing supply chain systems including advanced analytics and artificial intelligence solutions for monitoring supply chain performance. Our projects span Supply Chain Operations Reference (SCOR®) activities: Plan, Source, Make, Deliver, and Return.

Energy, Sustainability, Infrastructure

Guidehouse's Energy, Sustainability and Infrastructure (ES&I) segment is amongst the largest energy management consulting teams in the industry. Our team includes attorneys, economists, social scientists, mechanical, electrical and civil engineers, regulatory and public policy strategists, environmental permitting and public relations specialists. Drawing on our pool of highly qualified personnel and broad corporate experience, Guidehouse can form exceptional teams to deliver broad capabilities, help clients manage complexity, and accelerate program objectives.

IBM Expertise

Supply Chain and Advanced Analytics

- Data Strategy
- Descriptive, Predictive, and Prescriptive Analytics
- Data Visualization
- Operational Excellence and Optimization
- End-to-End Supply Chain Visibility and Transparency

Client success story:

USAID Global Health Supply Chain Optimization and Analytics (GHSC-PSM)

On USAID's Global Health Supply Chain – Procurement Supply Management (GHSC-PSM), IBM provides comprehensive information technology infrastructure, strategy, and decision-support tools to enhance USAID's ability to deliver essential health commodities. IBM also provides global supply chain advisory services, including but not limited to network optimization, health systems strengthening, forecast and demand planning, and strategic sourcing.

IT Management

- Safety and Compliance
- Systems and Network Security
- Help Desk Support

Client success story:

U.S. Agency for International Development (USAID) Information Technology Infrastructure and Systems (IT IS)

IBM helped USAID gain operational efficiencies and cost savings and improve service levels and the user experience through the work on IT IS. IBM supported the transformation of USAID services to a managed service model, providing comprehensive global 24x7 IT services to all of USAID's operating units, including overseas missions, through transparent performance management linking data from back office to programmatic use for accountability and reporting.

Digital Strategy

- Co-creation and Enterprise Design Thinking
- IBM Garage and Rapid Prototyping
- Intelligent Automation

Client success story:

USAID Office of Afghanistan and Pakistan Affairs (OAPA)

IBM supported the USAID Office of Afghanistan and Pakistan Affairs (OAPA) in Washington and at the missions in Islamabad, Pakistan and Kabul, Afghanistan. The IBM Team led the strategy, development, and maintenance of Workforce Management Tools (WMTs) and a Knowledge Management Tool, and supported ongoing continuous learning and adaptive management across functional areas, ranging from IT, to communications and operational analytics.

Client success story:

USAID Mission in Timor Leste

IBM is supporting USAID/Timor Leste workforce resiliency by providing a strategy and action plan for organizational improvement. Program activities include Federal Employee Viewpoint Survey (FEVS) analysis, virtual Enterprise Design Thinking (EDT) sessions, interviews, information synthesis, and delivery of a strategy.

OASIS and IBM

IBM has been awarded prime contracts for Pool 1 (General Consulting Services), Pool 2 (Financial Management Services), Pool 3 (Engineering Service Focus), and Pool 4 (Research Services). To receive contract awards in a specific Pool IBM has demonstrated past success and achievement in that defined area. As a Prime Contractor in Pools 1, 2, 3, and 4 IBM consistently engages the right people and solutions to address Federal Agency requirements in support of critical mission needs. IBM has a rich history of successful project completion – on time and within budget.

The impact of our work

The Demographic and Health Surveys Program includes 300 surveys in 90+ countries and has earned ICF a global reputation for the collection and dissemination of accurate, representative data on health indicators and outcomes.

The Clean Energy Emission Reduction Protocol and Tool provides a consistent approach for estimating, reporting, and aggregating GHG emission reductions from clean energy programs and investments.

The Roll Back Malaria Monitoring and Evaluation Reference Group (MERG) and the UNAIDS MERG rely on ICF to review, update, and define global indicators for malaria and HIV.

Standardized Survey Tools for the USAID Bureau for Food Security, including Zone of Influence Surveys, provide the evidence base to help target assistance to address food insecurity.

The Infectious Disease Detection and Surveillance Program supports the global response to detecting and preventing the spread of pandemics, including COVID-19.

Mathematica
Progress Together

About Mathematica

Mathematica is the trusted partner for changemakers around the world who are confronting development challenges and working to advance children's literacy and educational attainment; improve reproductive, maternal, and child health; expand access to safe drinking water; increase agricultural productivity; improve economic opportunities and connect communities through infrastructure. Driven by our mission to improve public well-being and our commitment to objective, rigorous research and analysis, we work closely with partners to share insights that inform decision making, identify learning priorities, and amplify impact. Our team of seasoned experts leverage their deep expertise in international health, education, agriculture, energy, and other sectors to reimagine how the world gathers and uses evidence to address the most urgent development challenges. To support our clients, Mathematica relies on a staff of more than 1000 economists, sector specialists, data scientists, statisticians, qualitative researchers and research analysist.

Capabilities

Evaluation

- Rigorous impact evaluations, including rapid-cycle approaches
- Mixed-methods performance evaluations
- Portfolio and summative evaluations
- Process and implementation evaluations
- Evaluation technical assistance and capacity building

Measurement and learning

- Monitoring, evaluation, and learning (MEL) frameworks and plans
- Collaboration, learning and adaptation (CLA)
- Performance measurement and dashboards
- Data science, data analytics, and predictive modeling
- Systematic evidence reviews
- Learning agenda development, facilitation of learning processes and workshops

Data collection

- Remote and in-person training for data collection
- Innovative data collection methods, including GPS and SMS
- Using GIS technology for locating and linking sample design and data collection
- Survey design and questionnaire development
- Mobile- and web-based solutions for participant tracking and data intake
- Qualitative data collection, including focus groups, site visits and key informant interviews
- Collecting observational data such as classroom and in-home observations in person or by video

- Women's economic empowerment and gender equity

Selected experience

For the USAID LAC Bureau, we designed and implemented rigorous evaluations of early grade reading programs in Guatemala, Honduras, Nicaragua, and Peru that examined the impact of teacher training, student support, and community outreach on children's educational outcomes. Through these efforts we built the capacity of local organizations to collect high quality data and trained local stakeholders to understand the implications of the findings on future programs.

Our research in Tanzania for the Millennium Challenge Corporation (MCC) provided valuable information to the country's policymakers, as well as its development partners, on how expansion of the national electric grid and low-cost connections to grid electricity affected energy consumption, energy expenditures, household income, business activity, health, and educational outcomes for rural and peri-urban households.

We helped improve health systems across Sub-Saharan Africa and Asia for the Rockefeller Foundation by examining the effectiveness of health systems interventions and conducting four in-depth country case studies. The evaluation assessed the initiative's design, implementation, outcomes, and cost-effectiveness, and incorporated performance monitoring to track progress toward outcomes. The results and learning products developed informed the Foundation's global health strategy.

We use cutting-edge approaches like satellite imagery and remote sensing to help obtain more precise farmer productivity estimates in many of our agricultural evaluations for MCC. In Burkina Faso, Senegal, Niger, and Moldova we are testing the impact of training, upgraded irrigation infrastructure, and increased access to credit on farmer productivity and income.

NOVETTA

From Complexity to Clarity

Services for the United States Agency for International Development

FOCUS

Focused on mission success, Novetta delivers scalable advanced open-source media analytics coupled with proven technical solutions to address challenges of national and global significance.

EXPERTISE

- Advanced, customizable, social and traditional media analytics solution
- Machine learning (ML) for data enrichment including application of topic and sentiment ontology
- Data visualization in a web-based analytics dashboard
- Content curated from tens of thousands of traditional media and millions of social media sources
- Expert analysis services support for RFI research questions and reports

NOVETTA MISSION ANALYTICS

Capability: ML-Powered Misinformation Analysis

As the COVID-19 pandemic and interrelated infodemic spread across the globe in early 2020, Novetta and Amazon Web Services (AWS) partnered to address the discord in social media analysis between accuracy and speed. The resulting capability, Rapid Narrative Analysis (RNA), facilitates both by leveraging human expertise at critical stages of analysis, while using state-of-the-art ML models to allow effective and swift response to address the spread of misinformation.

Our approach significantly improves social media analysis by looking beyond message spread (*virality*) to measure message influence (*virulence*), enabling better activity tracking in near real-time, across disparate datasets. RNA also provides customized metrics aligned with the specific objectives of relevant stakeholders, enabling end users to quickly and effectively iterate their approach to achieve optimal results.

NOVETTA

Capability: Helping Agencies Combat COVID-19

Novetta Mission Analytics (NMA) is being used to monitor continent-wide public sentiment of non-pharmaceutical interventions for COVID-19 (self-isolation, social distancing, handwashing, business closures, etc.) and detect misinformation/rumors in support of policy-making decisions for the Africa Centers for Disease Control (CDC). Analysts use NMA to derive real-time pattern and behavioral analysis by collating open source content from traditional media (web-based and broadcast) and social media (Facebook, Twitter, WhatsApp) and enriching the data with machine learning and human-in-the-loop processes. This analysis is being disseminated from the Africa CDC command center to Regional Collaborating Centers (RCCs) to advise key stakeholders in developing effective strategies and policies for combating the rapidly growing COVID-19 outbreak.

NMA is actively combating disinformation

- **Tracking sentiment and public response** to government protocols for non-pharmaceutical interventions such as social distancing and hand washing.
- **Identifying and analyzing misinformation** and rumors surrounding COVID-19 outbreaks, government policies, and treatments in 10 major countries globally as well as across Africa.
- **Providing macro-level narrative analysis** of U.S. domestic media content and COVID-19 for developments of national-level significance.

Capability: Empowering Decision Makers Throughout Crisis Response

Novetta specializes in supporting international security and crisis response in non-permissive environments, where unbiased data collection is challenging, and misinformation is rampant. Customers use NMA to inform strategy and tactics in support of security and aid throughout crisis response.

Over the last five years, Novetta has supported the National Institutes of Health's (NIH) studies and trials in West and Central Africa by providing a feedback loop on how the public perceives the work in regions of focus - to ensure Ebola virus disease studies hit enrollment quotas. During this time (June 2015 – April 2020), Novetta collected and analyzed more than 300,000 statements from more than 66,000 unique sources.

NMA informs NIH

- Counters damaging rumors and misinformation among survivors of Ebola virus disease in Liberia and the Democratic Republic of the Congo.
- Combines open source data collection from domestic media and in-country field teams to collect additional print media and transcribe radio.
- Acts as an alert system for Ebola virus disease misinformation and reports customized indicators to the NIH.

ODYSSEY

GSA OASIS℠

SERVING UNRESTRICTED POOLS 1, 3, AND 4

Where Ability Meets Agility

ODYSSEY SUPPORTS CUSTOMERS ACROSS THE DOD. OUR MISSION IS TO MAKE YOUR MISSION A SUCCESS.

- Solution-oriented partner
- In-demand, cutting-edge technical capabilities
- Proven ability to execute large prime contracts

A six-time Inc. 5000 honoree, Odyssey has earned recognition as one of the most successful companies in America.

As an ISO 9001:2015-certified company, Odyssey maintains a robust Quality Management System (QMS).

EXPERTISE

C5ISR

Our C5ISR support plays a crucial role in the ability to coordinate and control the assets needed for military and civil mission success.

Aviation

Our technically advanced aviation support covers cradle-to-grave requirements for aircraft and their subsystems to develop, deliver, and sustain war-winning capabilities.

Software Solutions

We develop product-based agile solutions. The results are higher quality, lower-cost solutions that can be rapidly delivered to the warfighter.

Medical R&D

We provide critical technical and management support for DoD medical research and development, including the development of vaccines and therapeutics.

Space and Missile Systems

We support a wide range of Space Situational Awareness, satellite communications, offensive and defensive space and integrated air and missile defense (IAMD) systems.

CAPABILITIES

UR Pool 3: 47QRAD20DU326
UR Pool 4: 47QRAD20DU420

Company: PAE Government Services, Inc.

GSA OASIS Contract Number: GS00Q-14-OADU126 Pool 1 Unrestricted Full & Open Large Business

PAE Government Services Inc., and Macfadden & Associates, a PAE company, provide rapid response to complex international disasters, deliver humanitarian assistance to vulnerable populations, and build institutional capacity of government and non-governmental actors through training, equipment, and technical assistance. Working with a diverse client base including USAID, Department of State, National Science Foundation, NASA, Department of Defense, Department of Navy, Department of Air Force, Department of Homeland Security, Department of Justice, and the US Army Corps of Engineers, PAE/Macfadden delivers critical assistance in times of crisis. With a global footprint in more than 100 locations on all seven continents in some of the world's most challenging environments, our core service offerings include:

Disaster Response and Recovery: We know that disasters—whether natural or manmade—can strike anytime, anywhere, and the ability to quickly mobilize is critical. Our team has decades of experience and a first-hand understanding of the full life cycle of disasters and complex emergency response needs ranging from cartographic analyses to strategic communications campaigns to catalyze public support for individuals and families in need. Our disaster response and recovery work has included:

- Rapidly deploying Disaster Assistance Response Teams (DARTs) after the 2015 earthquake in Nepal
- Provision of evacuation services and facilities repair for Hurricane Matthew in 2016
- Preparation and lock-down of over 300 buildings and facilities including Mission Control for the International Space Station for NASA's Johnson Space Center for Hurricanes Ike (2009) and Harvey (2017)
- Fuel spill cleanup within 12 hours at Keesler AFB in Biloxi, MS resulting from Hurricane Isaac in 2012

Life Support Logistics Operations: In 2014, PAE provided extensive support in Liberia to fight the highly-lethal Ebola epidemic sweeping through the country. Urgency combined with effective safety measures and timely logistics support was critical to slowing the spread of the contagion. PAE provided clinical and nonclinical support to nine pre-designed, constructed and fully- equipped Liberian Ebola Treatment Units (ETUs) and non-clinical support to the Monrovia Medical Unit (MMU) in support of health-aid workers who became ill while performing their duties.

Humanitarian Assistance: PAE/Macfadden excels in managing large, complex programs across the globe, including rapid-response humanitarian relief efforts in South Sudan, eradicating Ebola in Liberia, and UN air-cargo operations in the Democratic Republic of the Congo (DRC). We have constructed and operated refugee camps, managed supply chains, dug wells to provide clean water, and ensured food is delivered to people in need. We do it quickly and to the highest standards of excellence.

GIS and Data Analytics: Our GIS team enables us to view, analyze, and interpret data in ways that reveal patterns, relationships, and trends by visually presenting complex data that can be immediately understood and shared for client response. We provide timely, accurate, and comprehensive data to decision-makers and first responders around the world in times of crisis. We collect, analyze, and disseminate remote sensing and GIS data; create impact maps to identify needs and resource gaps; and produce critical on-the-ground information, sometimes within hours of a disaster declaration.

Training: As part of our disaster response approach, PAE/Macfadden plans workshops and symposiums for host country governments to promote best practices in disaster responsiveness, provide monitoring services for disaster risk management legislation and policies, and develop client operating, training, and process/procedure manuals.

Grants Management: We help our clients develop and manage grants that provide direct, practical assistance to disaster-prone, vulnerable communities and populations through training, skills development, and equipment.

Providing solutions for sustainable development

RTI International is an independent, nonprofit research and international development institute dedicated to improving the human condition by turning knowledge into practice. For more than 60 years, we've used evidence and data to achieve impact.

Our international development staff design and implement programs across a wide range of sectors to help low- and middle-income countries and communities address complex problems and improve the lives of their citizens. We work with local partners and stakeholders to provide solutions that promote sustainability, self-reliance, and success at scale.

RTI has been a trusted partner to USAID for 50 years. Beginning with a regional population studies contract in Asia in 1970 , we have expanded to work across all development sectors and have implemented more than **750 USAID projects in 150 countries**.

RTI has been awarded contracts under Unrestricted Pools 1 (contract pending), 2, and 4 (contract pending)

About Us

Peerless Technologies Corporation (Peerless) performs a wide array of program management, information technology, cybersecurity, software development, research, engineering, test and evaluation services, business operations support and logistics services for a wide array of Department of Defense (DoD) and non-DoD federal customers.

Founded in 2000 and based in Dayton, Ohio, Peerless has almost 500 employees in 19 states and Washington D.C. The company maintains a mature corporate infrastructure, including dedicated managers for Human Resources, Recruiting, Quality, Contracts, Purchasing, Pricing, Program Control and Security to support operations and functions nationwide.

Peerless has an ISO 9001:2015 ed Quality Management System, an ISO 14001:2015 Environmental Management System and is assessed at Capability Maturity Model Integration Level 3 to ensure technical performance and and contract management quality.

Miracle Systems is a leading contractor to the Federal Government with core competencies spanning PMO services, engineering services, consulting, IT modernization initiatives, mission-critical cyber support, and comprehensive training services. We prime over 100 contracts and are known for thought leadership, innovation, ethics, and client satisfaction.

Miracle Systems GSA OASIS Pool 1 Overview

Miracle Systems is one of the most successful GSA OASIS vendors under the Small Business Pool 1 domain serving the U.S. Federal Government for the last 18+ years serving missions and initiatives in over 20+ agencies and 20 countries. Through our GSA OASIS Pool 1 Unrestricted Contract, we bring multiple advantages to our Federal Government clients offering them with streamlined acquisition options at a lower contract access fee (CAF) via GSA's One Acquisition Solution for Integrated Services (OASIS). GSA OASIS is a multiple award, Indefinite Delivery Indefinite Quantity (IDIQ) contract that provides flexible and innovative solutions for complex professional services. GSA OASIS is a Best-in- Class (BIC) IDIQ Contract Vehicle.

USAID Capabilities: As Prime, Miracle Systems provided strategic support services to the USAID Office of the CIO, effectively consolidating five disparate contracts and focused on efficiencies and cost savings. Miracle Systems provided oversight and subject matter expert support for Program and Project Management, Process and Program Quality Management, Change Management, Governance, PMO, FITARA Implementation Activities, Enterprise Architecture, Engineering Management, IT Operations Support. We ran the PMO and were responsible for project throughput and adherence to USAID's Software Development Lifecycles (Waterfall and Agile) while overseeing a portfolio of over 30 IT initiatives. We built an Agile Center of Excellence and a robust PMO that advances coordination across the organization, improved financial management, risk management, and Agile Development Principles (SAFE Agile, etc.). We ensured the reliability, security, and optimal performance of the USAID Multi-Cloud IT Infrastructure (AWS and Azure) by developing, improving, and maintaining the IT Strategic Plan, architecture models, standards, and reference artifacts that ensure a well-architected and integrated environment. Our team provided solutions focused on Cloud first approaches (e.g., PaaS, SaaS, IaaS), consolidation of IT services, and increased mobility. We served as an escalation tier to Operations & Maintenance to keep all aspects of USAID's IT environment functioning. We facilitated process maturity, in alignment with industry frameworks (COBIT, ITIL, CMMI), to document 33 processes, measure and assess process effectiveness, and provide continual process improvement. Through our support, we achieved over $2M in cost savings and organizational efficiencies to USAID.

ABOUT US

QuantiTech, LLC is a Large Business headquartered in Huntsville, AL with over 2,200 personnel. Founded in 1991, QuantiTech was a successful WOSB for 29 years. QuantiTech was acquired by and entered into a strategic partnership with Sagewind Capital in May 2020. Since then, QuantiTech has aqcuired Dynamic Concepts, LLC, Systems Engineering Group, and has merged with Millennium Engineering and Integration Company. QuantiTech has a proven track record of successful performance and prime contract execution across our growing DoD and FEDCIV customer base. QuantiTech is financially strong, has highly experienced corporate leadership, and possesses mature, Government approved and Industry leading certified business management systems. QuantiTech is reliable, relevant, and ready to meet our customers' challenges.

CUSTOMER BASE

QuantiTech has consistently provided excellent support to a broad customer base including:

- Advanced Turbine Engine
- Air Force Special Operations Command (AFSOC)
- Air Force Test Center
- AMCOM Logistics Center (ALC)
- Army National Guard
- Combat Capabilities Development Command Aviation & Missile Center
- Future Vertical Lift

VECTRUS
TRUE TO YOUR MISSION

OASIS UNRESTRICTED CAPABILITY STATEMENT

OASIS SM
One Acquisition Solution for Integrated Services

ABOUT VECTRUS

For more than 70 years, Vectrus has provided critical mission support for our customers' toughest operational challenges. As a high-performing organization with exceptional talent, deep domain knowledge, a history of long-term customer relationships, and groundbreaking technical expertise, we deliver innovative, mission-matched solutions for our military and government customers worldwide. Whether it's base operations support, supply chain and logistics, network operations, engineering and digital integration, security, or maintenance, repair, and overhaul, our customers count on us for on-target solutions that increase efficiency, reduce costs, improve readiness, and strengthen national security. Vectrus is headquartered in Colorado Springs, Colo., and includes about 7,100 employees spanning 148 locations in 26 countries and territories. In 2020, Vectrus generated sales of $1.4 billion

CONTRACT DATA

Vehicle Type	Multi-Agency, Multiple Award Contract (MAC)
Contracting Agency	General Services Administration (GSA)
Eligible Users	All Federal Agencies Worldwide
Government User Fee	Innovative tiered access fee ranging from 0.1% to 0.75% based on obligation level.
Task Order Types	All contract types including: FFP, T&M, Cost, and Hybrids
Period of Performance	September 29, 2020 – December 19, 2024
Contract Number	47QRAD20DU133
Contract Benefits	Tier 3, Best-in-Class (BIC) contract vehicle, single solution for complex requirements, no maximum order or ceiling limitations, ordering Contracting Officer determines terms and conditions and/or provisions and clauses, evaluation criteria, and method of awards.
Contractor Information	DUNS: 030468243; CAGE Code: 1D510

SCOPE

GSA's OASIS contracts make buying complex professional services easy and efficient with innovative streamlined solutions. By using OASIS, federal agencies can focus on their expertise and mission while GSA delivers program management and contract administration at the master level.

OASIS contract scope includes, but is not limited to: Core requirements: engineering services, scientific services, logistic services, financial services, management consulting services, program management, and all types of R&D. Areas of expertise: intelligence, compliance, defense, disaster, energy, R&D, environment, health, communication, security, transportation, ISR, and artificial intel.
